

Morphy Strength Faces Acid Test

The strength of San Quentin's Morphy chess club and their chances of winning the championship in either the Bay Area Industrial or the El Camino Chess Leagues will be tested on the week-end of January 11 and 12 when the top teams from each league journey to San Quentin for decider matches.

In the Bay Area Industrial League the Morphies have built up 25½ points out of a possible 32 in four encounters; Shell Development, the Morphies Friday evening foe, have bettered this to lead the league.

The Nimzovitch Chess Club make their annual appearance the following day, representing the El Camino League.

Woodpushers representing the Morphies will be Felix D'Agostino, Robert Booth, Doug Hallinan, Harry Kor, Robert Cromwell, John Hill, Jack Ransen Peter Testic and Rudolph Lowe.
