By MARTIN MORRISON and ELWIN MEYERS

En Passant Editors

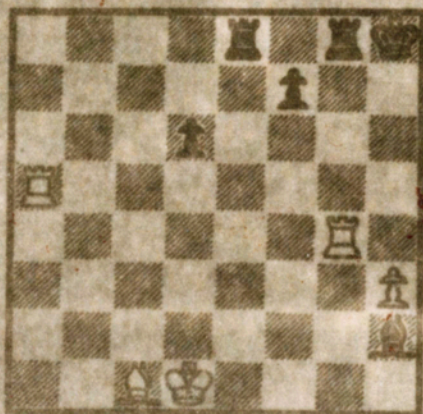

The Xerox Corporation through its education subsidiary, Basic Systems, Inc., has again demonstrated its great concern for cultural advancement by releasing a beginning chess book which uses the recently-developed technique of programmed learning. Below is illustrated the book's cover, which is taken from one of the simpler frames actually presented in the book for solution. A review of this book will be found in this issue of En Passant.

## Bobby Fischer Teaches Chess

Learn to think the same way Bobby does.  
Learn by being put in increasingly complex situations  
that require you to think and move. Not just read.

**THIS COURSE IS FOR EVERYBODY.** Whether you're a beginner  
or a more experienced player, you'll be a better player  
after you take Bobby Fischer's Chess Course. It works.

In this position:

- White can mate in one move
- White cannot mate.

If White can mate, draw an arrow to show his mating move.

(Solution on page 95)

En Passant is edited and published monthly by the Publicity Directorship of the Oakland Chess Club. It is the official newspaper of the East Bay Chess Association, which is composed of the Berkeley YMCA, Concord, Hayward, Oakland, Richmond, and Walnut Creek Chess Clubs. Members of these clubs are automatically members of the EBCA.

Subscriptions: \$1.25 per year (to cover publication and mailing costs). Back numbers: on request.

Submission of material by readers is encouraged and becomes the property of the editors. To be assured of consideration for publication, material should be received at the above address by the first of the month preceding the month of issuance. Material should be typewritten, following the style used in this newspaper.

Subscribers should notify the editors as soon as possible of a change in address or telephone number.

Chess problems are a challenge. They test one's ability to foresee the next move, to think logically, and to observe the position. Problems are meant to stimulate one's mind, to pit chess know-how against its authors, and to increase one's ability to use a positional advantage.

Material advantage is an aid, but not a must in a problem game. One must know position to use his material wisely. Material gain without positional advantage has led to more lost games. Therefore, material advantage means very little without positional knowledge.

Problems aren't meant to be a game position, although their ideas may arise from an actual game. They are not meant to teach one chess theory. They don't give one the experience or anxiety that an over the board battle would. But they do allow us to enjoy chess when he has spare moments or no opponent.

The key move in most problems illustrates an idea or a theme which the author felt worthwhile to demonstrate. The theme varies, but the problems remain to be solved and to be enjoyed by all.

SOLUTIONS TO LAST MONTH'S PROBLEMS: No. 4--P-Q3; No. 5--NxP(K7); No. 6--K-N3.

**BOOK REVIEW: BOBBY FISCHER TEACHES CHESS**

By BASIC SYSTEMS, INC.

An Education Subsidiary of Xerox Corporation

Bobby Fischer Teaches Chess, ROBERT J. FISCHER, DONN MOSENFELDER, and STUART MARGULIES. New York: Xerox/Basic Systems, Inc., 1966. 334 pp., 275 diagrams, \$6.95.

A new method for learning chess has been created by the Education Division of Xerox Corporation. It is entitled Bobby Fischer Teaches Chess and was coauthored by the youthful United States chess champion.

The system is unique in that it trains the player to think four moves ahead; it is easy to understand; it does not use chess notation and does not require the use of a chessboard. It has solved many long-standing problems in teaching chess and presents the course as a tutor would to a student. The student becomes an active participant by acting on 275 different chess situations and immediately putting to use the new idea put forth under each position. The ordinary chess book has always placed the reader in a passive role. He studied the presented material and hoped to retain it. The student also found it necessary to set up a chessboard and place the pieces according to the suggested lesson. The method was laborious and a good deal of trouble.

The method of teaching in the Bobby Fischer Teaches Chess book is part of the new learning concepts utilized in so many areas by the Education Division of Xerox Corporation. This method is based on an understanding of how people learn and is widely used in industry and in schools. The student learns quickly and retains the material far better this way than from conventional textbooks or lecture methods.

Bobby Fischer Teaches Chess was coauthored by Donn Mosenfelder, a leading innovator in education, and Stuart Margulies, Ph. D., a top psychologist of Basic Systems, Inc., part of the Education Division of Xerox Corporation, which has created this new concept of learning the ancient and eternally popular game.

\*

This book can teach anybody Bobby Fischer's tactics to playing winning chess in just ten hours. Bobby Fischer, the U. S. Champion chess player, provides the chess know-how. And Xerox Education Division provides its highly successful teaching techniques. This course is a revolutionary breakthrough in Chess instruction. There is very little to read, and there is no chess notation. But there is plenty to think about. This course puts the reader in increasingly complex situations that require him to think out his and his opponent's moves 1, 2, 3, and even 4 moves in advance.

Bobby Fischer Teaches Chess has a budget of over \$100,000 for advertising on Xerox nationwide TV specials and in national magazines. It is attractively bound in hard cover. The book is available from: Xerox/Basic Systems, Inc., 880 Third Avenue, New York, New York 10022, by sending a check or money order for \$6.95.

8  
\*\*\*ARTICLE: SOURCES OF CHESS MATERIALS\*\*\*

By MARTIN MORRISON

En Passant Editor

The editors of this newspaper are constantly asked where there are good sources of chess books and equipment. In this article will be presented a descriptive listing of all the major sources of which we know. If any reader knows of other good sources, please write. Perhaps if we get enough response, a more comprehensive listing will be published in the future.

1. PROBLEMS. Sources of these are many, but are often hard to find. International Master George Koltanowski regularly publishes problems in his chess column in the San Francisco Chronicle. Another less well-known periodical source is the new "World in Books" of the United Publishers' Association, 36 Melrose Street, Boston, Massachusetts. This periodical is issued quarterly at a subscription cost of \$1.00 per year. The chess column is edited by E. M. Reubens and contains problems and a problems contest, along with reviews of current chess books. Dr. Eugene Albert, 826 Eureka Avenue, Davis, California 95616, also has recently issued an interesting book entitled Ideal-Mate Chess Problems. This book, priced at \$2.50, should be a refreshing change for the avid problemist.

2. BOOKS. Aside from the usual book-store sources there are a number of mail-order companies specializing in chess books. One company that deals exclusively with chess books and a limited number of paper supplies is the Chess Book Club, P. O. Box 11154, Dallas, Texas 75223. An excellent selection is presented at discount prices. Dover Publications, Inc., 180 Varich Street, New York, New York 10014, specialized in chess books, some of which have been printed by their company only. Other books are advertized through the United States Chess Federation, 80 East Eleventh Street, New York, New York 10003. Substantial savings are offered on these books to USCF members. An excellent tournament book of the Oakland Chess Club's Second Annual Summer Tournament, which drew such Bay Area greats as Steven Joplin, James Hurt, Paul Vayssie, Aki Kanemori, and John Smail, is available from the Publicity Directorship, Oakland Chess Club, P. O. Box 1622, Oakland, California 94604, for only \$0.50. Published by the Paul Masson Vineyards is a booklet containing the official international laws of chess, which can be obtained by writing the Paul Masson Vineyards, c/o 3049 Laguna Street, San Francisco, California 94123. This book should be a must for all chess players.

3. EQUIPMENT. As chess clocks are not made in this country, all have to be imported from Europe. The USCF sells these imported clocks, but even at a discount, the cost is quite high (\$23). By ordering clocks directly from Europe, duty fees are avoided and thus the price is much less (from \$8 up), even though delivery is slower. A great selection is available from E. L. Rattmann, 2 Hamburg 74 (Billstedt), Stein furter Allee 12, Postfach 365, Germany. Sets and rolled boards are also available from this same source. Again, the USCF sells materials of all kinds, which can be ordered from the address given above. An excellent magnetic set can be obtained from George Koltanowski, 3049 Laguna Street, San Francisco, California 94123 for \$3.75

4. Miscellaneous. For those interested in dice, gambling, or unorthodox chess, the Las Vegas Chess Association, 611 North Main Street, Las Vegas, Nevada 89101, has manufactured a game called "Vegas Fun Chess," which is very popular in that famous (or infamous) city and elsewhere. Complete with instructions, dice, and tumbler, the fun chess unit costs \$3.00.

5. PERIODICALS. Among the well-known periodicals exclusively on chess can be mentioned Chess Life, 80 East Eleventh Street, New York, New York 10003, which is a monthly publication containing twenty-five pages of news, games, pictures, etc. for \$4.00 per year. Similar in scope and selling for \$7 per year is Chess Review, edited by Israel A. Horowitz; order from 174 West 72nd Street, New York, New York 10023. Issued quarterly with twelve pages is Chess in Action, which is published by the Chess Friends of Northern California, 2763 Chelsea Drive, Oakland, California 94611; this periodical sells for \$3.00 per year, and a subscription includes members in that organization. Last but not least, one must mention En Passant, a monthly newspaper of twelve pages, containing news, problems, games, articles, etc.; subscriptions: \$1.00 per year, from Post Office Box 1622, Oakland, California 94604. The latter two periodicals have an emphasis on Bay Area chess.

When ordering any of these items, please mention this newspaper. By doing this you will help us provide you with more information and special discounts. Again--write us of your "pet" sources for these items.

\*\*\*ARTICLE: MORPHY'S WATCH\*\*\*

By D. E. KEELER

San Francisco

Visitors to the San Francisco Academy of Sciences at Golden Gate Park may see on display there, in the timepiece section, a watch dial made by the two English watch dial painters John and George Webb, who migrated to this country in the late 1850's.

This dial, which bears the inscription: "made for Paul Morphy by the American Watch Co.," is from the beautiful presentation watch given to Morphy by the Brooklyn Chess Club at a testimonial arranged by Frederick Perrin on May 25, 1859.

Mr. P. W. Sargeant in his book Morphy Gleanings\* (page 23) describes the watch thus: "the watch had a stem surmounted by a coronet, studded with diamonds, and the places of the numerals were taken by representations of chess pieces in red and black. On the case were the initials "P. M.," the arms of the United States, and the inscription: "to Paul Morphy from the Testimonial Committee of the New York Chess Club as their tribute to his genius and worth, May 1859."

Morphy pawned this watch while engaged in some expensive legal matters\*\* The watch was seen later by Mr. W. J. A. Fuller, who says it was shown to him by Arnous de Riviere at the Cafe de la Regence in the summer of 1885. Fuller says Riviere "loaned Morphy a large sum upon it" and that "the pledge was never redeemed." A. W. Mongredien (son of Augustus) saw the watch again in Paris, 1921, and was offered it for 6,000 francs. It was then the property of the heirs of Arnous de Riviere.\*\*\*

What became of the watch since then and how the dial came to the Academy of Sciences are interesting questions which some reader may be able to answer. I am informed that Mr. Bruce O. Koch at the Hamilton Jewelers (980 Market Street, San Francisco) may know the answer to the first question, but have not been

able to contact him.

\* David McKay Co., 1931.

\*\* Against his brother-in-law Sybrant, who was administrator of his father's estate.

\*\*\* For this history of the watch I am indebted to P. W. Sargeant.

\*\*\*EAST BAY CHESS ASSOCIATION RATINGS\*\*\*

Compiled by MARTIN MORRISON and ELWIN MEYERS

En Passant Editors

EBCA ratings are computed by and supplied through each player's own chess club on the basis of games played between EBCA members and thus subsume club ratings. The ratings are computed on the USCF and CFNC standard of sixteen points, plus or minus four per centum of the difference in rating points between the players.

If your rating does not seem correct or is not listed, see your club rater. The club raters are: John Smail, Berkeley YMCA Chess Club (B); James Bush, Concord Chess Club (C); Jerry Friedman, Hayward Chess Club (H); Raymond Ng, Oakland Chess Club (O); Peter Brown, Jr., Richmond Chess Club (R); and Saleh Mujahed, Walnut Creek Chess Club (W).

The following is the monthly listing of members' EBCA ratings; each member's name is followed by his club affiliation(s) and then his EBCA rating.

Fritzinger Captures Bay Area Championship

By MARTIN MORRISON

En Passant Editor

A brisk, clear mornign brought chess players from as far as Klamath Falls, Oregon, Sparks, Nevada, and Chicago, Illinois, to the First Annual Bay Area Amateru Open Championship. A total of 79 players had registered with the tournay's sponsors, the Oakland Chess Club, by the beginning of play at 10:30 a.m., Saturday, December 17. The play breezed on through three rounds that day under the able direction of David Blohm. Then on Sunday play proceeded in a slower manner; round four began at 10 a.m., and round five did not conclude until 10 p.m., when the winners were announced, and the prizes awarded.

Dennis Fritzinger, of Vacaville, was the ultimate victor with 5-0, but James Ulrich, of Berkeley, also placing 5-0, although losing the title and first-place trophy on tie-breaking points, forced a split of the cash; both players, then, received \$87.50. Michael Goodall, of Berkeley, placing 4-1, captured the third-place trophy and \$50, while D. E. Keeler, of San Francisco, and Le Roy Post, of Mill Valley, both finishing 4-1, each merited \$10.

To the highest-finishing B, Saul Silvan, of Mountain View, went a purse of \$75 and the B trophy for his score of 4-1. David Lynn, of Saratoga, and David Amkraut, of Palo Alto, took the second and third B trophies, respectively, although Raymond Ng, of Alameda and Roy McCollough, of Oakland, also placed 3-1, causing a four-way split of the \$80 cash prize for those places.

A six-way tie among the C's caused a split of the prize money in this division as well, into bundles of \$13.35, although Stephen Markman, of Sacramento, won the first C trophy on tie-breaks. Winning the second C trophy was John Barrientos, of San Francisco, while Charles Parcels, of Folsom, took the third C trophy. Also sharing in the tie were James Bush, of Concord, James Fosaaen, of Concord, and Stuart Thorsby, of Palo Alto.

The club also awarded prizes to those who registered in advance, but who did not win prizes in the regular competition. Out of these thirty-five players, Herbert Rosenbaum, of San Carlos, took the highest trophy, Robert Mitchell, of Klamath Falls, the

second; both players scored 4-1. Janis Salna, scoring 3-1, and Roger Gribble, of San Francisco, scoring 3-2, merited third and fourth place books, respectively.

### Third Mill Valley Open Chess Tournament

On Saturday and Sunday, January 7 and 8, the Third Mill Valley Open will be held at the Mill Valley Youth Center, Sycamore Avenue and Camino Alto, Mill Valley. The entry fee is \$10 and membership in the United States Chess Federation. A first prize of \$100 is guaranteed. Second and third place prizes, as well as prizes for the highest A, B, and C will be awarded if the number of entries permit. Registration will be held before 10 a.m., Saturday, January 7, or by mail to L. A. Post, 314 Marin Avenue, Mill Valley.

### Hayward Chess Club Tournaments

The final results of the Hayward Chess Club Round Robin Tournament, concluded November 30 are: first place, A. P. Shepperson (trophy), second place, William Castellano (two months' club dues), and Ernest Bartholomew (one month's club dues).

Starting December 13, the club is inaugurating a new Club Novelty Round Robin Tournament, in which White, before each game, will draw a card from an envelope to determine the opening and defense each player must use for the first three or four moves.

The club's ladder prizes for the month of November went to David Drinkwater for winning the most EBCA rating points during the month (32), and to Carl Ehmman for playing the most EBCA rated games during the month (seven).
