

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 1

JULY 17, 1966

Edited by Isaac Kashdan, Tournament Director

TOURNAMENT STARTS

After months of planning, and many problems that had to be resolved, the second competition for the Piatigorsky Cup is a reality. More than 700 spectators thronged the Nautilus Room of the Miramar Hotel in Santa Monica for the opening round.

All the players invited were present, ready to do battle for the \$20,000 in prizes offered by the Piatigorsky Foundation. In addition, the Foundation is paying all traveling and living expenses for the month-long event.

Up to two days before the tournament was to begin, we could not be certain who would actually be here. The Russians were the biggest question mark. On Monday, July 10, came word that the USA-USSR track meet in the Los Angeles Coliseum was off. On Tuesday we learned that the meeting at which this decision had been made was held, of all possible places, at the Moscow Chess Club.

On Wednesday, when Petrosian and Spassky were due to leave Moscow, we had still heard nothing directly from them, but we were informed that due to technical difficulties, they would not be on the flight scheduled that day.

Ah, well, why go into the conferences that ensued, the frantic inquiries made, the questions of replacements, etc. On Friday the Russians arrived, and all was well.

The tournament was officially opened by Jerry Spann of Oklahoma City, former president of the U. S. Chess Federation, and vice-president of the International Chess Federation (FIDE).

A rousing ovation resulted when Mr. Spann introduced Mr. and Mrs. Gregor Piatigorsky, whose continuing efforts brought the tournament to fruition. Mrs. Piatigorsky has been indefatigable, not only in the major planning and decisions, but in the myriad of details necessary in the staging of the event.

GAME NO. 1

QUEEN'S GAMBIT DECLINED

Petrosian Spassky
White Black

It was freely predicted that this game would be drawn, and indeed it was. It was the shortest game of the round, and the first to be completed. There was a flurry of interest when Petrosian doubled his rooks on the seventh rank, where they looked menacing.

Spassky had evidently planned ahead, however. He gained an important move by

threatening mate, and the world champion soon conceded the draw.

GAME NO. 2

KING'S INDIAN DEFENSE

Reshevsky Fischer
White Black

This first meeting between the American aces was eagerly anticipated. In the last U. S. Championship Tournament Reshevsky had defeated Fischer, though the latter won the championship, as he had six times previously, starting when he was under 15!

Reshevsky had a slight edge in the opening, but it led to nothing tangible. He took far more time than Fischer, and was close to the mark when the necessary 40 moves were completed. Each player is allowed 2½ hours for that many moves in the five hour playing session.

At the end, each player had a passed pawn. The kings had to hustle to the other side, with each getting there on the dot.

22-KR-QB	P-QR4		

GAME NO. 3
KING'S INDIAN DEFENSE
Portisch Najdorf
White Black

This was Najdorf's first grandmaster encounter in over a year, and he seemed on edge. Having an inferior position in the center, he tried a diversion on the queen side. In the complications resulting from 22 P-K5 Portisch came near to winning a piece.

Instead Najdorf gave up the exchange for a pawn. Both players got short of time and in a position with many possibilities they agreed to a draw.

34-P-N4	PxPch		

GAME NO. 5

NIMZO-INDIAN DEFENSE
Donner Unzicker
White Black

Though Donner was a pawn ahead at one time, it is questionable whether he could force a win. Opposite colored bishops had resulted from a series of exchanges. The extra pawn was doubled and on the wrong color. Donner succeeded in weakening Unzicker's king side pawns, but this also led to no permanent advantage.

GAME NO. 4

QUEEN'S INDIAN DEFENSE
Ivkov Larsen
White Black

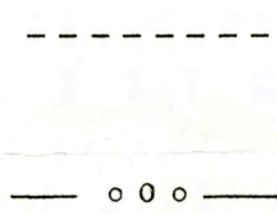

This was the only game adjourned in the first round. The procedure is that after five hours the tournament director calls a halt, and whoever is on the move, instead of making his next move on the board, writes it on his scoresheet and encloses it in a sealed envelope. This envelope is opened when play is resumed, when the sealed move is shown to the opponent and then made on the board.

The game was a sad disappointment to Larsen. He was the exchange behind, and in addition Ivkov had two menacing passed pawns.

It was not always so. Larsen had a clear positional advantage shortly after the opening. There were no real attacking chances, however, since the queens had been exchanged earlier. Ivkov's pawns were weaker, and his pieces were not coordinating.

All this changed after Larsen's 35 ... P-KN4. Suddenly Ivkov's pawns were connected, his knight became a power and his rooks were threatening.

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 2

JULY 19, 1966

Edited by Isaac Kashdan, Tournament Director

ACTION INCREASES

There was considerably more action in the second round than in the first. The games were longer, with four out of five going into a second session. The battles were much more tense all around. Although three games were drawn, any of them could have been decisive.

Were the players feeling each other out in the opening round, and now have no further need for sparring? Or are they now fully acclimated after the vast distances most of them covered to get here?

Whatever the reason, the grandmasters were in the mood to play great chess, and they delivered. The large audience relished the action. Many of them came back Tuesday morning, when the adjourned games were completed.

GAME NO. 6

RUY LOPEZ

Spassky Unzicker
White Black

Spassky took almost no time in the opening. He is perhaps the greatest authority on the Ruy Lopez, and plays either side with equal ease. He obtained the small advantage that is inherent in the white game.

The play was almost wholly on the king side. Unzicker attempted to weaken the white pawns with 32 ... P-KR4, but this only helped in the later opening of lines.

The sacrifice 36 N-B5! is almost normal in this formation. Spassky moved in quickly with his heavy artillery, and Unzicker's position was soon untenable.

GAME NO. 7

SICILIAN DEFENSE

Larsen Donner
White Black

Larsen had the better of the opening, and for a time was a pawn up. When it came down to the ending, his pawns were scattered, and Donner's knight was as agile as the white bishop.

Many of the typical endgame situations were demonstrated, starting with rook and pawns, king and pawns, and graduating to a new queen for each. Larsen's advantage had dissipated somewhere along the line, and the draw was the only solution.

GAME NO. 8

QUEEN'S GAMBIT

Najdorf Ivkov
White Black

This was the shortest game of the tournament to date, and a highly merited win for Najdorf. He outplayed his much younger opponent throughout.

Clever maneuvering in the center forced an inroad, and Najdorf's queen was able to capture the queen knight pawn, safely for once. The prettiest move was 23 RxP! The rook cannot be captured, of course, because of 24 QxRch!

13-QxB	P-K4	26-Q-N7	Resigns

GAME NO. 9
RUY LOPEZ

Fischer Portisch
White Black

This was another variation that the players seemed to be familiar with, rattling off the early moves in almost no time. In fact the first 20 moves are given in a discussion on the opening that appears in the May, 1966 issue of Chess Review.

The result was that Fischer lost the exchange for one pawn. Whether this was all premeditated we know not, but the 23-year-old U. S. champion took it calmly, and in the following maneuvers he improved his position considerably.

By adjournment time Fischer had picked up a second pawn, ample material equivalent for the exchange. It was he who played for a win in the second session.

Portisch's two rooks were a bit too powerful, however. They held back Fischer's pawns for a time, and at the finish set up a threat of perpetual check. Fischer set some traps, but Portisch was much too cagy. In the final position 72 KxR would lose for white, but any rook move leads to a draw.

GAME NO. 10
QUEEN'S INDIAN DEFENSE
Petrosian Reshevsky
White Black

Most of the pieces remained on the board throughout in this game. Petrosian had more mobility after the opening, and Reshevsky's bishop was particularly restricted.

In order to make progress, however, lines have to be opened, either by pawn exchanges or sacrifices. Neither player was so inclined. Both took a great deal of time, and had to make the last dozen moves at a fast rate.

What happened was a series of moves, which, without ever repeating any position, left the basic structure unchanged. After adjournment, there might have been more of the same, but a draw was agreed to without resuming play.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 3

JULY 20, 1966

Edited by Isaac Kashdan, Tournament Director

CHAMPION BOWS

World champion Petrosian rarely loses a game. His defensive skill is one of his outstanding qualities. When behind in material or if he has an inferior position, he creates a series of problems for his opponent, and generally escapes.

Thus it was real news when Portisch came through with a victory in 32 moves. We believe this is the third time in his career that Portisch has downed Petrosian, a worthy record.

In the first Piatigorsky Cup competition three years ago, Petrosian also started poorly, losing to Gligoric in the second round. This proved to be his only loss, however, and he went on to tie with Keres for the top prize. Is this another year?

GAME NO. 11

NIMZO-INDIAN DEFENSE

Reshevsky Spassky
White Black

A draw after 20 moves with practically all the pieces on the board is not likely to be exciting. The players obviously had considerable respect for each other.

The game could certainly be considered even when it was abandoned, with lots of opportunities for both sides.

White	Black	White	Black
1-P-Q4	N-KB3	11-R-K	QN-Q2
2-P-QB4	P-K3	12-P-QN4	R-K
3-N-QB3	B-N5	13-B-N2	B-KB
4-P-K3	P-QN3	14-N-B3	P-N3
5-B-Q3	B-N2	15-N-K4	NxN
6-N-B3	O-O	16-BxN	P-Q4
7-O-O	P-B4	17-B-Q3	PxP
8-N-QR4	PxP	18-BxBP	B-N2
9-P-QR3	B-K2	19-Q-K2	P-QR3
10-PxP	P-Q3	20-P-N5	Drawn

GAME NO. 12

KING'S INDIAN DEFENSE

Portisch Petrosian
White Black

The opening was along well explored paths. Petrosian seemed to plan an advance on both wings. His 13th move B-R3 was effective for a time, but proved to be the wrong diagonal.

In fact, it was this long diagonal that proved to be the key to the game. Portisch's bishop and later his knight dominated the important squares close to the black king. When Petrosian opposed the bishops, it was too late.

In the final position Portisch was bound to win the exchange as a minimum.

STANDINGS OF THE PLAYERS

Najdorf	2	Fischer	1*
Portisch	2	Ivkov	1*
Spassky	2	Larsen	1
Donner	1½	Petrosian	1
Reshevsky	1½	Unzicker	1

*One game adjourned.

The champion might have continued, but his prospects were dim indeed, and he decided to bow his king.

White	Black	White	Black

16-PxP	N-R4	32-N-B6	Resigns

GAME NO. 13

KING'S INDIAN DEFENSE

Ivkov Fischer
White Black

There was little to choose in the opening here. Fischer started a pawn advance on the queen side which eventually left Ivkov with a weak pawn. Fischer methodically built up his attack against the pawn, bringing his bishop on a long march from the other side.

His strategy succeeded, and he captured the pawn at the 40th move, just before time to adjourn. Despite the presence of opposite colored bishops, Fischer's chances for a win are quite favorable.

GAME NO. 14
 KING'S INDIAN DEFENSE
 Donner White Najdorf Black

The tactical complexities from the 18th through the 25th move lent considerable excitement to the game, and are worth careful study.

The result, however, was the disappearance of all the center and queen side pawns. Thereafter the game was quite simplified. The game lasted the entire five hour session, and the players then agreed to draw rather than adjourn.

GAME NO. 15
 SICILIAN DEFENSE
 Unzicker White Larsen Black

With Unzicker castling queen side, and Larsen holding his king in the center, direct king side attacks were expected. Unzicker was the more inventive in the early middle game, which had some interesting situations.

Unzicker broke through to win a pawn, and later, with both players short of time, he captured another. By this time, Larsen had his rook and queen bearing on the white king.

Sacrificing the rook, Larsen forced a draw by perpetual check, then started to analyze with Unzicker to determine what might have been. Often these post-mortems are as interesting as anything that occurred in the game itself.

11-BxN	NPxB	30-RxR	PxR

 SIDE LIGHTS

There is far more interest in the tournament than in the first Piatigorsky Cup competition three years ago. The attendance is greater, the news media is present at every session, and requests for these bulletins are coming from all over the world.

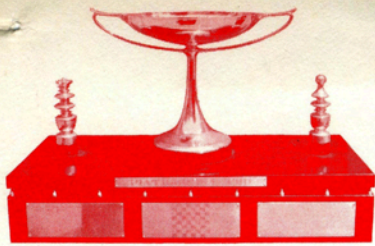

The quality of the players is of course the basic reason. There is the greatest assemblage of grandmasters in many years. There is also the general increase in chess interest, especially in the United States in the last few years.

Another factor is the sponsorship. The Piatigorsky Cup is already synonymous with chess on the highest level, and its significance will be augmented with each tournament.

Every effort has been made in behalf of the spectators. Some elements of the visual aids are quite new, at least for chess tournaments.

The positions on all five games are shown on large screens hung behind the players. These are reflected from small plastic sets handled by youngsters sitting just behind the masters. Every time a move is made, the boy makes the corresponding move, which is instantly shown on the screen. Mrs. Jacqueline Piatigorsky conceived the idea, and followed it through. This took months to check equipment, find the right plastic to reflect in color, have the boards and pieces designed, etc. The effect is far superior to the wall boards commonly used.

The clocks used by the players are electric devices, controlled so that the time is recorded only for the player on the move. These are synchronized to large clocks hung by the screens. The number of moves made is also shown, so that the spectators have all the information needed to judge the games.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 4

JULY 21, 1966

Edited by Isaac Kashdan, Tournament Director

DULLSVILLE

All five games were drawn in this round. Something wrong, you say? The players are not trying, perhaps? The situation is worth analyzing.

There were tremendous variations in some respects. The shortest game was 16 moves, the longest 80, both records for the tournament to date. On a time basis, one lasted just over three hours and another almost eleven hours.

As skill increases in chess, the percentage of draws inevitably rises. Among novices a draw is a rarity. Oversights, even to allowing a mate in one, are all too common.

With the grandmasters you are in a different world. Threats and parries are far more subtle. What appears to be a quiet, aimless series of moves, may have undercurrents of remarkable combinations, which both players have seen, but do not actually occur on the board.

A drawn game, which may look dull, may have been a sharp conflict, with neither player being able to inflict his will on the other.

On the other hand, there is the so-called grandmaster draw. This is a game in which the players have made no real effort. Perhaps they respect each other too much, perhaps they are exhausted from a previous difficult struggle, and need more rest. Such a game is called a draw with very few moves made, few pieces exchanged and all kinds of possibilities for play.

It would certainly be reprehensible for players to agree in advance on a draw. This is rarely done, but players are soon aware of each other's peaceful intentions. Either way, the grandmaster draw is unfair to sponsors, spectators and to the world of chess in general. We expect of the masters that they will give of their best at all times.

What then of this tournament? Fifteen of 20 games have been drawn, a high percentage, but indicative of the almost equal strength of this group. No matter what the pairings, these are worthy opponents.

GAME NO. 16

SICILIAN DEFENSE

Spassky Larsen
White Black

Every tournament has a game that goes on and on. Adjournments are necessary intervals. After all, everyone needs some time to eat and sleep—and analyze.

STANDINGS OF THE PLAYERS

Fischer	2-1/2	Reshevsky	2
Najdorf	2-1/2	Ivkov	1-1/2
Portisch	2-1/2	Larsen	1-1/2
Spassky	2-1/2	Petrosian	1-1/2
Donner	2	Unzicker	1-1/2

This game was played from 6:30 to 11:30 p.m. Thursday, and continued on Friday from 11 a.m. to 3 p.m. and 5 p.m. to 6:30 p.m., a total of 10-1/2 hours.

At that stage Larsen was in time trouble! He had eight moves to make in about one minute. This was the fourth control point since the game started ages ago. Larsen quickly forced a perpetual check to end matters.

Spassky seemed to have the better of the opening, with Larsen's pawns badly weakened. After considerable maneuvering, however, Larsen wound up a pawn ahead for the endgame.

He made every effort to move ahead, but got nowhere against Spassky's sturdy resistance.

GAME NO. 18
RUY LOPEZ
Fischer Donner
White Black

The variation starting with 8 ... P-Q4 was originated by Frank Marshall, long-time U.S. chess champion, nearly 60 years ago. He designed it as a dashing counter-attack, suiting his aggressive style.

The variation is still popular today, but with a difference. It is now considered one of the reliable ways to draw(!) with the black pieces.

Spassky used it three times in his match with Tal last year, drawing every time. Donner had the same result here. As it happened, Donner never recovered the pawn, or completely equalized.

Fischer's problem was the opposite colored bishops, with their normal tendency to draw. He may have missed Donner's clever 30 ... RxR, which forced the exchange of queens and rooks.

GAME NO. 19
KING'S INDIAN DEFENSE
Petrosian Ivkov
White Black

Was this a grandmaster draw? A respectable number of moves were made, but only one piece had been exchanged when the game was abandoned, and there were plenty of possibilities besides the repetition of moves.

For world champion Petrosian this is a sad beginning. He has not scored a victory in four games and at the moment is tied for last place.

That is a bit deceptive, however, as he is only one point below the leaders in the tightly bunched standings. We have no doubt that Petrosian will be heard from, and vigorously.

<u>White</u>	<u>Black</u>	<u>White</u>	<u>Black</u>

ADJOURNED GAME

Fischer defeated Ivkov in the game adjourned from the third round. Ivkov resigned without further play. He had to lose a second pawn, and had no chance to save the game, despite the opposite colored bishops.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 5 JULY 24, 1966

Edited by Isaac Kashdan, Tournament Director

TOURNEY OFFICIALS

It was Sunday, the spectators filled the room with standees all around, and the grandmasters were all ready to do battle. Towards the end of the session, with complex and exciting positions in every game, and moves coming faster, eyes kept turning from board to board, trying to keep up with the action. Chess a slow, dull game? Not this time.

The people most concerned in the last half hour or so, when some of the players are very short of time, are the tournament officials. The tournament director is visible most of the time, sitting on the far side of the platform, or moving around shushing for silence.

Clothed in anonymity and much less visible are the assistant directors. They are also invaluable in maintaining order, taking care of many details, and being on hand whenever needed.

For this tournament we were fortunate to get the services of the same people who were with us during the first Piatigorsky Cup competition three years ago. Former California State chess champion Harry Borochoy, high rated master player Jack Moskowitz and chess organizer and official George Goehler, all highly competent and experienced.

Perhaps the most responsible task of the directors is being on guard for possible time forfeits. If several players are short of time, each director is assigned a game. He must know the number of moves made and watch the clock. There is a little flag on each clock that is raised by the minute hand as the hour is approaching, and drops just as the hand reaches 12. When the flag drops and the proper number of moves has not been made, he must call the forfeit.

If for any reason the clock is not going properly or the flag does not rise or fall as it should, the director must be alert and still make a decision on the actual time status.

No problem has arisen so far. At times the players have been extremely close, but the 40th move has been made, to the relief of all concerned.

GAME NO. 21

NIMZO-INDIAN DEFENSE

Portisch Spassky
White Black

Having defeated world champion Petrosian a couple of rounds earlier, Portisch must have felt it was only fair to take a point from his recent challenger. He certainly tried.

STANDINGS OF THE PLAYERS

Portisch	3	Reshevsky	2*
Spassky	3	Petrosian	2
Fischer	2-1/2*	Ivkov	1-1/2*
Najdorf	2-1/2*	Larsen	1-1/2*
Donner	2-1/2	Unzicker	1-1/2*

*One game adjourned

Portisch developed a pawn roller on the queen side, and advanced even at the sacrifice of a pawn. His pieces found good squares and kept Spassky continually on the defense.

When it looked as if Portisch's attack was menacing, Spassky found a neat method of exchanging forces, leaving himself with two rooks versus the white queen. The game was then quite even.

GAME NO. 22

RUY LOPEZ

Ivkov Reshevsky
White Black

Reshevsky has regularly used most of his time for the first 20 moves or so. He then leaves himself a minute or two for the last few moves. He seems calm through it all, though it makes for tension in the audience and keeps the directors on their toes.

Whether it is good for his chess is another matter. In this game the upshot of a rapid series of moves (Ivkov was also short of time) was an adjourned position with Reshevsky a pawn behind. It is a fairly simple ending, in which the advantage for Ivkov may not be enough for the point.

GAME NO. 23
BENONI DEFENSE
Donner White Petrosian Black

Donner was ready to mix with the champion, opening lines on the king side quite early. Neither player could make good use of the open knight file.

In the melee Donner won a pawn. But exchanges and opposite colored bishops soon brought a clearly drawn position.

Incidentally, the opposite bishops are becoming a Donner patent in this tournament. He also had them against Unzicker and Fischer. They account in part for Donner's five straight draws.

GAME NO. 25
KING'S INDIAN DEFENSE
Larsen White Najdorf Black

The opening was the kind Najdorf has favored in the past. Hold the center and advance directly against the opposite king. When the time comes, give up material as necessary to open the lines.

Najdorf followed his plan, but Larsen did not. At least he did not collapse or allow himself to be blasted off the board, as the script had it.

Larsen accepted the offered pawn and simply held it. True, he has two sets of doubled pawns to worry about, and the result of the ending is far from clear.

GAME NO. 24
SICILIAN DEFENSE
Unzicker White Fischer Black

Fischer kept moving forward on the king side, building up a menacing looking formation. There was no immediate target, however, and not enough open squares for all the pieces ready to move in.

Up to adjournment Unzicker's defense was quite solid. There is much to study for both sides.

ROUND NO. 6

JULY 25, 1966

Edited by Isaac Kashdan, Tournament Director

GAME NO. 26

KING'S INDIAN DEFENSE

Spassky Najdorf
White Black

The game was evenly contested. Najdorf advanced his QRP to the sixth. He then gave up a pawn to get his rook to the seventh rank, pick up the white RP, and queen his own.

He succeeded in every detail. Spassky also had plans, however. By the time Najdorf got his second queen, Spassky's was already on the board, and the draw was still secure.

GAME NO. 27

RUY LOPEZ

Fischer Larsen
White Black

The exchange variation of the Ruy made its first appearance, in a variation popular in the 1930's. Fischer got two active bishops and a seemingly strong positional advantage.

He hesitated at critical moments, however, and his pieces got into each other's way. In the final position Larsen's passed pawn had to win at least a piece, and Fischer's threats were gone.

GAME NO. 28

TARRASCH DEFENSE

Petrosian Unzicker
White Black

It was said of Petrosian in his recent successful match with Spassky that he did not mind draws, and won only when he had to. Perhaps he has the same feeling about the situation here. Though he has a minus score, he is still only one point behind first, with 12 rounds to go.

At any rate, there was not much of interest in the game. After considerable maneuvering, with most of the pieces still on the board, moves were repeated and the draw agreed.

GAME NO. 29

NIMZO-INDIAN DEFENSE

Reshevsky Donner
White Black

This was Reshevsky's first win, and a dream of a game. Starting with the breakthrough in the center by 24 P-Q5! he seemed to have but one thought - mate! The sacrifice of the bishop and the attack that followed was a fine conception.

Reshevsky could have won Donner's queen by 29 N-R4ch, K-R4; 30 R-K5ch, but he preferred to go after the king. The final rook sacrifice was a fitting touch.

GAME NO. 30

KING'S INDIAN DEFENSE

Portisch Ivkov
White Black

The ending was of interest here. Ivkov was a pawn ahead, but Portisch's pieces were much more active. He soon regained the pawn, resulting in equality. The game was adjourned after Black's 42nd move, and the draw agreed without resuming play.

ADJOURNED GAMES

Three games had been adjourned from the fifth round. Ivkov vs. Reshevsky was postponed to Friday. The other two were played off on Tuesday. The continuations follow:

GAME NO. 24

Unzicker vs. Fischer

When the game was adjourned Fischer had expected to win, and Unzicker to lose. Fischer had a much stronger formation, with a dangerous king side attack looming.

Yet nothing happened. Fischer moved his forces from one area to another and seemed quite indecisive. The master plan, whatever it should have been, evaded him. In fact, Fischer was on the defensive in the final position.

GAME NO. 25

Larsen vs. Najdorf

Larsen had started with a pawn ahead, but it was not too clear how he was to proceed, with two of his pawns under constant attack.

His solution was to give up one pawn, exchange Najdorf's active pieces, and then march in, particularly with his king. The idea worked perfectly. Najdorf was forced to give up two knights for a rook. The material advantage, plus Larsen's strong passed pawn, soon forced the win.

PRIZES

The \$20,000 prize fund for the tournament, contributed by the Piatigorsky Foundation, is by far the largest total ever offered for a chess event. It is twice the total prizes for the first Piatigorsky Cup competition three years ago.

Here is the breakdown:

1st prize	\$5,000	6th prize	\$1,500
2nd prize	\$3,000	7th prize	\$1,300
3rd prize	\$2,250	8th prize	\$1,150
4th prize	\$2,000	9th prize	\$1,050
5th prize	\$1,750	10th prize	\$1,000

In addition the winner will receive a beautifully fashioned replica of the Piatigorsky Cup, which in itself is a work of art.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 7 JULY 27, 1966

Edited by Isaac Kashdan, Tournament Director

CHAMPIONS DOWNED

This was no day for champions, but for everyone else it was by far the greatest round of the tournament. The action varied from board to board.

The early interest was mostly in the Najdorf-Fischer game, with Najdorf's forceful advances presaging the final result. As soon as this was over and Fischer had resigned, the decision in the Larsen-Petrosian game was looming.

Larsen's sensational combination is one for the books. Rarely has Petrosian been defeated so drastically. The queen sacrifice looks sound enough after examination, but it was startling when first played.

No sooner was this game completed when attention was focused on Spassky, who was quietly but thoroughly taking the measure of Ivkov.

So Fischer and Petrosian, who with Spassky were the prime favorites, are down in the second division. Each has lost twice. Petrosian is completely unrecognizable, with no game in which he was even close to a win.

Larsen is clearly the most aggressive player to date, with three wins to his credit. Najdorf and Spassky have each won twice. On the other end Ivkov has most losses, three.

GAME NO. 31
QUEEN'S INDIAN DEFENSE
Ivkov Spassky
White Black

This was the last game to be finished, but it was considerably overshadowed by the others, and had scant attention from the spectators.

After an equal development and some exchanges it turned into a queen and knight ending. Spassky's queen was the more mobile, taking up a dominating position on K8. Spassky won a pawn and then a knight when Ivkov blundered in time pressure.

GAME NO. 32
QUEEN'S GAMBIT DECLINED
Donner Portisch
White Black

This also drifted into a queen and knight ending after leisurely exchanges. However, there was no perceptible advantage for either player in the final position, and after a couple of moves were repeated, they agreed on the draw.

White	Black	White	Black

GAME NO. 34

SICILIAN DEFENSE

Larsen Petrosian
White Black

PLAYERS' WIVES

This may well turn out to be the game of the tournament. Larsen got the typical white bind in the opening, and Petrosian never equalized. His knight march from moves 15 to 17 only lost further time and space.

Larsen's pieces completely dominated the king side. The brilliant breakthrough by 25 QxP! brought a collective gasp from the large audience that was something to hear. A few minutes later came a hearty round of applause for Larsen when the champion resigned.

Mrs. Rona Petrosian and Mrs. Norma Reshevsky are with their husbands at the tournament. Both are in the playing room practically all the time.

Mrs. Petrosian frequently sits in the front row, intently following the moves. Mrs. Reshevsky prefers the back seats, and is generally ready to inform anyone interested as to how her husband is doing.

This is Mrs. Petrosian's first visit to the United States. She had been expected three years ago, but apparently could not make it. She speaks English well. She claims to be the best chess player of any of the Russian grandmasters' wives. "The others cannot play at all!" she states. Evidently no threat to women's world champion Nona Gaprindashvili, also of the Soviet Union.

The Petrosians met at a chess tournament. She acts as her husband's secretary and generally accompanies him on trips. They have two children, boys of 18 and 12.

The Reshevskys are accompanied by their eldest daughter, Sylvia, who is a frequent, though not constant visitor, to the tournament room. They have another daughter and son, who are undoubtedly following the games in New York.

15-P-B4	N-B2	30-R-N3	Resigns

GAME NO. 35

KING'S INDIAN DEFENSE

Najdorf Fischer
White Black

Najdorf played very well, and Fischer poorly, which is the story of the game. Fischer advanced his pawns on both wings, but left gaps when he could not coordinate his pieces.

Najdorf gained command of the key center squares. His knights and then his queen took up menacing positions. The game ended when Fischer lost a piece on an oversight, but he had no real defense at that point.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 8

JULY 28, 1966

Edited by Isaac Kashdan, Tournament Director

NO (OR VERY LITTLE) COMMENT

There are a number of long games to play over, so our readers will miss (we hope) our usual comments in this space. It was a great day for the Russians, who displayed their virtuosity in the endgame, and scored two important points.

GAME NO. 36

GRUENFELD DEFENSE

Spassky Fischer
White Black

The real game starts after practically all the force is gone. Spassky gives a classic demonstration of the superiority of the bishop over knight when the pawns are unbalanced on both sides of the board. For Fischer, it was his third straight defeat, with Petrosian to play next!

White	Black	White	Black
1-P-Q4	N-KB3	26-Q-B2	K-R

25-B-N	Q-B3	50-B-R2	Resigns

GAME NO. 37

KING'S FIANCHETTO GAME

Petrosian Najdorf
White Black

Again the ending was the feature, and most instructive. Petrosian won a pawn towards the end of the first session. With all the pawns on one side, and a couple of pieces for each, it would normally be a draw.

Petrosian, who had not won a game to this point, played beautifully to develop every possible chance. As in the Spassky game, the advantage of bishop over knight was a vital factor.

STANDINGS OF THE PLAYERS

Spassky	5½	Donner	3½
Larsen	5	Petrosian	3½
Portisch	4½	Unzicker	3½
Reshevsky	4½	Fischer	3
Najdorf	4	Ivkov	3

The writer was particularly interested in the two games. We were known as a specialist in this type of ending back in the 30s, and had developed some of the techniques now commonly used.

GAME NO. 38

DUTCH DEFENSE

Reshevsky Larsen
White Black

What is a 19-move game doing in this issue? Reshevsky is involved in another game

further on which will take a little longer to peruse.

Larsen sacrificed a pawn for a free position. He was able to use his mobility to repeat moves, which neither side could avoid very well.

<u>White</u>	<u>Black</u>	<u>White</u>	<u>Black</u>

15-R-Q2	P-N3		

GAME NO. 39
SLAV DEFENSE

Portisch Unzicker
White Black

The minor pieces apparently were the theme of the round. Portisch had two bishops versus bishop and knight, and made every effort to exploit the slight advantage. The pawns were too solidly blocked, however, and he could find no way to break through.

<u>White</u>	<u>Black</u>	<u>White</u>	<u>Black</u>

GAME NO. 40
CARO-KANN DEFENSE

Ivkov Donner
White Black

This was evenly contested throughout. It was the seventh draw in eight games for Donner. Curiously, there is a four-way tie for this total, the others being Portisch, Reshevsky and Unzicker.

ADJOURNED GAME

The adjourned game from the fifth round between Ivkov and Reshevsky was postponed and played off at the same time as three from the eighth round. Following is the continuation.

GAME NO. 22
Ivkov vs. Reshevsky

Ivkov was a pawn ahead, and tried hard to win. It eventually came to a book draw, despite White's two pawn margin.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 9

JULY 31, 1966

Edited by Isaac Kashdan, Tournament Director

HALF WAY

This round marked the half-way point of the tournament. Every player has met every other. Another complete round-robin is still to come, with exactly the same pairings as in the first nine rounds, except that colors will be reversed.

A double round-robin, the plan for the Piatigorsky Cup competitions, is the fairest possible arrangement. Colors are always balanced, so that each player has the same choice of openings against every opponent.

The cross table in the next column will give our readers a quick view of what has been happening to date. The blank spaces are because of games adjourned at this point. These should be completed in time for the next bulletin. Enter the results and the totals for the players involved, and you will have a complete record of the first half of the tournament.

Now to the ninth round itself. Played on a Sunday afternoon, we had over 800 spectators, probably a record for any chess tournament ever held in this country. Most of them had their eyes glued to one board, with one of the competitors tied for last place in the standings, and the other just half a point above.

There is nothing like a champion, however, and any time world champion Petrosian meets U. S. titleholder Fischer, a real battle can be expected, and the audience will be there.

The other players all knew the crowd was present. It was a chore when the masters occasionally had to move through the crowd. The volume of sound was noticeable, but not too bad, considering. The click and whir of cameras, at least in the first few moments, was almost constant.

Two of the games were over fairly early, but two others were still going at the five-hour mark, to be continued Tuesday morning. As soon as the Fischer-Petrosian game was over, attention was drawn mostly to Unzicker vs. Ivkov, in which the latter had seconds left for his last half dozen moves. He made them all right, but the adjourned position was hardly to his liking.

GAME NO. 41

NIMZO-INDIAN DEFENSE

Donner Spassky
White Black

Donner got firmer control of the center, and a lasting positional advantage. The final position was reminiscent of the Spassky-Fischer game.

This time Donner had the bishop for knight, each had a passed pawn, and there

CROSS-TABLE--FIRST ROUND-ROBIN

	S	L	R	N	P	U	D	P	F	I	Total
1 Spassky	x	½	½	½	½	1	½	½	1	1	6
2 Larsen	½	x	½	1	½	½	½	1	1	0	
3 Reshevsky	½	½	x	½	½	½	1	½	½	½	5
4 Najdorf	½	0	½	x	½	½	½	0	1	1	4½
5 Portisch	½	½	½	½	x	½	½	1	½	½	
6 Unzicker	0	½	½	½	½	x	½	½	½	½	
7 Donner	½	½	0	½	½	½	x	½	½	½	4
8 Petrosian	½	0	½	1	0	½	½	x	½	½	4
9 Fischer	0	0	½	0	½	½	½	½	x	1	3½
10 Ivkov	0	1	½	0	½	½	½	0	x		

was at least play for a win. Donner preferred to maintain his string of draws, now eight out of nine games played.

GAME NO. 42

SICILIAN DEFENSE

Unzicker Ivkov
White Black

There have been remarkably few oversights in the tournament. Players have been outmaneuvered, have missed something in a sharp tactical exchange, have occasionally misjudged a position. But even in time trouble, accuracy has been the rule.

An exception was Ivkov's 18th move, missing an elementary shot. Trying to recover the lost pawn, he went in for a series of exchanges, but found himself losing a rook for knight when the flurry was over.

GAME NO. 43
VIENNA GAME

Larsen Portisch
White Black

The Vienna is a rarity in modern master chess, especially a variation in which White threatens mate on the move. Such things are more customary in simultaneous exhibitions.

Larsen obtained a good game. After the exchange of queens, Portisch's pawn formation proved weak, and he eventually lost a pawn. In the adjourned position, Larsen's king was ready to help in a coming pawn advance.

GAME NO. 44
NIMZO-INDIAN DEFENSE

Najdorf Reshevsky
White Black

If there is a typical Reshevsky game in the tournament, it is one which ends in a draw in the early middlegame, with most of the pieces still on the board.

Not all his games by any means. Reshevsky has figured in the longest game, 93 moves, and the shortest, 16 moves. But five games have ended in draws in less than 25 moves. Reshevsky has drawn eight times, to equal Donner.

Somewhere in all this we have already described the Najdorf game, so can pass on.

GAME NO. 45
SICILIAN DEFENSE

Fischer Petrosian
White Black

Petrosian's opening was the kind that is played when trying for a win, and Fischer was also willing to mix it. There were no grand combinations, but there were a number of points of interest, and the game will be taken apart by analysts for some time.

When Fischer offered the exchange of queens, there was a murmur that he was ready for a draw. Not so. It was part of a plan to use his better development for a quick opening of lines. He sacrificed a pawn to the same end.

Fischer not only regained the sacrificed pawn but picked up another to put him ahead. Did he then have a won game? That is the major problem for the analysts.

Petrosian justified his reputation as a great defensive player. He forced Fischer's knight into an unfavorable position, blocked the queenside pawns, and made it difficult for Fischer to advance. When the draw was agreed just before adjournment time, it seemed the proper decision.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 10

AUGUST 1, 1966

Edited by Isaac Kashdan, Tournament Director

STANDINGS AND STATISTICS

There are three groups now in the standings. Spassky and Larsen are far in the lead. Larsen would be first should he take the adjourned game with Ivkov.

Seven of the ten players are in a practical tie around the 50% mark, able to move fast in either direction with a couple of decisive results. Ivkov is not really a group, but is some distance away for the moment.

Here are some statistical notes from the first half of the tournament that might be of interest. Of the 45 games played in nine rounds, 15 were won and 30 drawn, a high percentage of draws even for grandmaster chess.

There has been some improvement in this respect. In the sixth to ninth rounds, there were nine wins out of 20 games, closer to the 50% draws in the first Piati-gorsky Cup.

A real surprise is the predominance of white wins, 12 out of 15! The first move is an advantage, but should not prove so powerful. Fischer figured in two of the black wins, defeating Ivkov with that color and losing to Larsen with white. The third black win was by Spassky over Ivkov.

GAME NO. 46

QUEEN'S GAMBIT

Spassky Petrosian
White Black

This was the second meeting between the Russians, and the second quiet draw. This was expected, and it has become part of the normal state of things that Russians competing in international tournaments will draw with each other.

It is no help to their standings, since each player loses half a point. Anyone who can win enough games has no fear of players who draw. A quick draw does mean more rest for the participants and disappointment to spectators.

GAME NO. 47

RUY LOPEZ

Fischer Reshevsky
White Black

Automatic draws are not the style with Americans, certainly not with Fischer. The 23-year-old U. S. champion had not won a game since the third round, and he was starving for points.

Reshevsky had the worst of the opening, with a backward pawn on the open QB file, and the strong outpost for White's knight. Fischer went all out in the attack against the queen side pawns, eventually winning one.

The action then shifted to the king side, where Reshevsky attempted to find counterplay. In almost no time Fischer also had his queen and rook ready for mating threats. It was the black king which was more vulnerable, as Fischer soon showed.

GAME NO. 49
PIRC-ROBATSCH DEFENSE
Larsen Ivkov
White Black

The game was adjourned after five hours, played off for another two hours on Tuesday, and adjourned again. In between Ivkov had a four hour session in a losing game with Unzicker from the ninth round. Who says chess masters have it easy? Or chess directors, for that matter.

In both sessions Ivkov was in severe time pressure, with seconds left at each control. He lost a pawn just before the end of the first session, and time may well have been a factor.

Instead of nursing the pawn plus, Larsen played boldly, giving up his knight for three additional pawns. Two of them moved up to the seventh rank to hold down Ivkov's king and one knight. Larsen's king and remaining pawns were ready for the final blows.

ADJOURNED GAMES

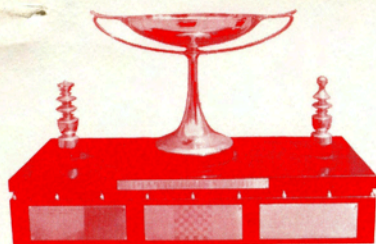

There were three adjourned games, but only two could be started without simultaneous performances. Unzicker vs. Ivkov and Larsen vs. Portisch* were held over from the ninth round, and Larsen vs. Ivkov from the tenth. We have already reported on the last pairing.

GAME NO. 42
Unzicker vs. Ivkov

Unzicker started the session the exchange ahead. With only one pawn each, there were considerable problems in winning. The early moves have an involved, repetitious pattern on the order of a square dance.

When Unzicker finally had his plan set, and started to advance his passed pawn, the end was near. The pawn got to the seventh in a hurry, in a hopeless position for Ivkov.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 11

AUGUST 3, 1966

Edited by Isaac Kashdan, Tournament Director

STANDING STILL

There was little change in the standings as a result of play in the 11th round. Fischer and Portisch charged places, but the congestion around the 50% mark remained the same. Larsen, instead of being potentially in the lead should he win his adjourned game from Ivkov, now could only tie Spassky.

Fischer is the player of the week so far, with $2\frac{1}{2}$ points against Petrosian, Reshevsky and Portisch. He moved up from ninth place to a tie for third in the interim.

It looks like a real battle between Spassky and Larsen for the top prizes. But anyone who wins twice in a row would be right up there, as Fischer has shown.

GAME NO. 51

SICILIAN DEFENSE

Unzicker Spassky
White Black

Three games of the round were agreed as drawn in 20 to 22 moves. The game was even at all times. If one grandmaster is satisfied to hold the line in this kind of position, there is little the other can do.

GAME NO. 52

KING'S INDIAN DEFENSE

Donner Larsen
White Black

After the exchange of queens on the 23rd move Donner offered a draw. Larsen might have accepted and joined the other players who were already through for the round. He decided to play on.

Having made his choice Larsen made some efforts to complicate, a difficult matter in a balanced position. Towards the end, Larsen's pieces seemed to be all in the wrong places, with his king far off. Something had gone wrong, and Larsen had lost.

It was Donner's first victory of the tournament, and Larsen's first setback since the opening round.

Query - should Larsen have accepted the draw? Certainly he would have been better off in this game. But he had also refused draws in other games and won. He has four wins, more than anyone else, against two

GAME NO. 53

QUEEN'S INDIAN DEFENSE

Ivkov Najdorf
White Black

This was the first game finished, and the shortest of the round, though not by much. Ivkov is now the only player without a single win. He has evidently played well below his form.

GAME NO. 54

NIMZO-INDIAN DEFENSE

Portisch Fischer
White Black

Somehow games do not look drawish when Fischer is playing. When he is "on," there

is an inventiveness, an originality to his play that has not been evidenced by anyone else in the tournament.

Giving up two rooks for a queen is not generally a good trade. In the ending particularly, the power of the rooks is generally decisive.

Fischer of course was not playing generally, but a specific position. He saw that after the trade he would win a pawn, and that his queen and knight would occupy dominating squares.

Portisch went in for it, perhaps judging the situation differently. As the game went, Fischer was clearly justified. His knight penetrated, and in a few moves forced the win of the exchange. After that it was routine.

passed pawn, with Larsen's king in strong support. Portisch had no effective counter play and soon resigned.

COMMUNICATIONS

Spectators to the tournament have noticed the number of young boys who have been up on the platform and engaged in other activities in the tournament room. They have been extremely effective and helpful.

Known as the Communications Committee, they are headed by Ed Kennedy, who has been active for some time as president of the Students Club and in other activities for junior chess players.

Five boys are needed while the games are going to handle the projectors showing the positions on the screens. The boys alternate every hour or so, very unobtrusively, and their accuracy has been a real aid to the audience, who are kept fully aware of the positions, time, number of moves made, and who is to play.

Five boys keep the official scores of the games, which the director refers to, especially in time pressure situations. Two or three boys transmit moves to the analysis room, where masters comment on the games in progress. The boys are also helpful in preparing the playing area before each round, and for any number of other chores that come up.

Following are the names of the committee, any one of whom can handle any of the tasks assigned: Dan Ackerman, Bob Bliss, Eddie Clark, Bob Engler, Steve Gruen, Steve Gusner, Jack Horn, Bob Klein, Jonathan Kolkey, David Lither, Richard Melnicker, Roger Neustaedter, Lee Pierson, Tim Pinkham, Peter Rhee, Jim Tarjan and Sheldon Telingator.

GAME NO. 55

NIMZO-INDIAN DEFENSE

Reshevsky Petrosian
White Black

No one would have ventured to predict at the opening of the tournament that the world champion would be languishing in the second division after 11 rounds.

None of the other participants has indicated any interest in helping Petrosian out of his predicament, nor has he shown any great personal anxiety. What about the current game? Just another draw.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 12

AUGUST 4, 1966

Edited by Isaac Kashdan, Tournament Director

TALE OF THREE PLAYERS

With two-thirds of the tournament over, perhaps it is time to take stock. Starting at the bottom, Ivkov is clearly out of the running, but any one of the others, certainly including world champion Petrosian, can land at or near the top in the remaining six rounds.

To make the point more effectively, let us take a close look at the performance chart of three of the players to date. Following are the round by round scores of Spassky, Larsen and Fischer.

Spassky $\frac{1}{2}$ -1- $\frac{1}{2}$ - $\frac{1}{2}$ - $\frac{1}{2}$ -1-1- $\frac{1}{2}$ - $\frac{1}{2}$ - $\frac{1}{2}$ - $\frac{1}{2}$ - 7 $\frac{1}{2}$
 Larsen 0- $\frac{1}{2}$ - $\frac{1}{2}$ - $\frac{1}{2}$ -1-1-1- $\frac{1}{2}$ -1-1-0-0 - 7
 Fischer $\frac{1}{2}$ - $\frac{1}{2}$ -1- $\frac{1}{2}$ - $\frac{1}{2}$ -0-0-0- $\frac{1}{2}$ -1-1-1 - 6 $\frac{1}{2}$

For consistency Spassky is obviously the choice. Undefeated, he has won three games and drawn nine, and leads, even if by a small margin.

Larsen and Fischer have each lost three times, yet are not far off. Larsen has more wins than anyone else, with five, and Fischer has four.

Larsen has been criticized for not accepting draws offered by his opponents in his last two games. He refused both times and lost. But how about five wins and a draw out of the previous rounds? These were not earned by taking draws.

Fischer's chart has three phases, mostly draws to start with, then three losses, and as of now, a three game winning streak. Based on present form, he is the player to watch. His games in the final two rounds with Spassky and Petrosian may well be the decisive ones.

GAME NO. 56

NIMZO-INDIAN DEFENSE

Spassky Reshevsky
 White Black

Spassky had pressure all the way in this game. His rooks, queen and knight all penetrated on the queen side, and something apparently had to give.

Just before adjournment Spassky won a pawn. It was then that Reshevsky called on all the grit and determination at his command. Spassky could only make headway by returning his pawn plus and move forward with his passed pawn.

To hold the game took perfect defensive tactics. Reshevsky found the way.

GAME NO. 57

QUEEN'S GAMBIT DECLINED

Petrosian Portisch
 White Black

Portisch had defeated Petrosian in their first meeting here and twice previously in Europe. Petrosian was out for revenge, and worked hard in two sessions, but could not get the elusive win.

There were some prospects in the knight and pawn ending for Petrosian, but the position proved a bit too simplified.

GAME NO. 58

SICILIAN DEFENSE

Fischer Ivkov
White Black

Fischer's three successive wins have been in 38, 35 and now 29 moves. Obviously no long drawn-out endings. The attack here was overwhelming. Fischer's pieces and pawns were all over the king side, and he had considerable choice of aggressive moves.

NxP on the 22nd move was no sacrifice, as the knight clearly could not be taken. It was the start of a four move maneuver with the knight that forced open the long diagonal. The entrance of Fischer's queen's bishop then clinched matters.

15-N-K4	B-N2		

GAME NO. 59

QUEEN'S GAMBIT

Najdorf Donner
White Black

The game started placidly, and might have been drawn in 25 moves or so, with no more comment than in a number of other instances.

Najdorf found a little weakness in Black's queen side, however, and started to move in. By a well managed exchange of pawns, he obtained a formidable passed pawn. This moved up, and in no time threatened to win a whole rook. That was enough.

GAME NO. 60

RETI OPENING

Larsen Unzicker
White Black

In an even middlegame, with opposite colored bishops and no particular targets for either side, Larsen tried to win. A legitimate objective, and this editor certainly will not fault him for it.

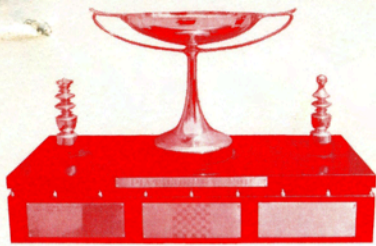

Larsen misjudged the position when he opened lines on the king side. He obviously had hoped to use them, but they turned out to be a made-to-order highway for Unzicker. The latter's 35th and 36th moves were the crushers.

Larsen had gotten extremely short of time, and rushed through the remaining moves. He had no time to resign, and stopped only on the mate.

ADJOURNMENT

Ivkov resigned without further play in the game with Larsen adjourned from the 10th round.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 13

AUGUST 7, 1966

Edited by Isaac Kashdan, Tournament Director

CONTENDERS

The game to watch should have been Larsen vs. Spassky, the two leaders in the battle for first place. Indeed, it was a game of great interest, with Larsen trying to recover after two setbacks, and Spassky trying to at least maintain, if not improve his standing.

For those who were present, however, there was no doubt that the major interest was in the Donner-Fischer game. It would have been Fischer no matter who the opponent was.

A week ago Fischer's fans had about given up on him. He was tied for last after the eighth round. Now look at the standings. Fischer is second. True, he will be a full point behind Spassky if the latter defeats Larsen in their adjourned game. With five rounds to go, anything can happen.

Another real contender is the veteran, 57-year-old Najdorf. If he wins his game with Unzicker, he will be right up there, tied with Fischer, and also going strong.

GAME NO. 61 QUEEN'S GAMBIT

Larsen Spassky
White Black

It takes patience to play the way Spassky did in the opening. He made no move to challenge the center, while Larsen built up a powerful looking formation. Yet after a few exchanges Black was quite well off.

Larsen might have had a strong passed pawn. Instead he tried to win a pawn, an idea which misfired. Finally it was Spassky who had an advanced passed pawn. At adjournment it looked menacing, and probably could not be stopped.

GAME NO. 62

SICILIAN DEFENSE

Unzicker Najdorf
White Black

Najdorf found a clever point after a series of exchanges. His 24 ... NxB threatened N-B7ch!, which Unzicker had to prevent pronto.

Unzicker then had a choice between remaining a pawn down or giving up two pieces for a rook. He chose the latter, and as some compensation got a pawn down to the seventh. Whether that is enough remains to be seen.

GAME NO. 63
KING'S INDIAN DEFENSE
Donner Fischer
White Black

We mentioned in the last bulletin that Fischer had won his last three games in 38, 35 and 29 moves. It is now 28, with the black pieces!

There was no direct king side attack. Fischer equalized readily in the opening, and perhaps had a little edge when he planted his knight on QB5.

The complications came with the threats on the K and QB files. When Fischer took the KP, Donner could only regain the material by a pawn capture with the queen. He then found his queen was in distress, and that was the game.

GAME NO. 64
QUEEN'S INDIAN DEFENSE
Ivkov Petrosian
White Black

This was the first game finished. It was a simple, sensible game with no great strain on players or spectators. The fact that the world champion was involved, and that he would remain with a minus score after 13 rounds, did not seem to bother him.

White	Black	White	Black

GAME NO. 65
NIMZO-INDIAN DEFENSE
Portisch Reshevsky
White Black

Portisch got the two bishops and better chances, despite a set of doubled pawns.

Both players used most of their time early, and had to rush at the end of the session.

Portisch settled for an ending which finally has only kings and pawns on the board. He may have expected something better, but the adjourned position seems quite equal.

ANALYSIS ROOM

Many of the spectators at the tournament sit through the five hour session in the prevailing hushed atmosphere. They can see the players, have good view of the positions on the large screens and can take part in the flurry of excitement when a game is ended.

Many others have discovered the special features of the Analysis Room, and either move in and out, or stay put as long as the action is going on.

In this room masters and experts discuss the games, using large wallboards on which the current positions are maintained. Questions are asked and answered, praise and blame are given for past moves, and predictions are freely made for future moves.

Irving Rivise is in charge of the room. His regular co-analysts are Jerome Hanken, Robert Jacobs, William Maillard and Carl Pilnick. When grandmaster Arthur Bisguier of New York visited the tournament for several rounds, he was impressed into service. So was Dr. Anthony Saily of San Francisco, and any other visiting luminaries to be found in the vicinity.

Special treats are the occasions when the tournament participants come in to explain a game just concluded. They are greeted with applause that can be clearly heard in the sedate tournament hall.

In fact, the whole progress can be followed from the main hall. When Fischer decided to go over one of his victories, word spread immediately and half the audience tried to move into the much smaller analysis room.

When Fischer was through, back came the throng, and it was some time before they accepted the decorum of the main room. They had obviously had a great experience.

ROUND NO. 14

AUGUST 8, 1966

Edited by Isaac Kashdan, Tournament Director

GAME NO. 66

RUY LOPEZ

Spassky Portisch
White Black

Spassky was probably playing to the score here. He had a winning adjourned game against his closest competitor, Larsen, and the man next in line, Fischer, was not doing too well against Unzicker on the adjoining board.

The game had hardly begun, but who could say it was worth more than half a point. It was the 10th draw for Spassky and the 11th for Portisch.

GAME NO. 67

PIRC-ROBATSCH DEFENSE

Reshevsky Ivkov
White Black

For the first 17 moves the game was identical with Larsen vs. Ivkov in the 10th round. Ivkov had a somewhat inferior position both times, with apparently nothing new to offer.

Reshevsky had some hopes right to the end, but Ivkov found adequate defenses when he had to. Ivkov claimed the draw when the same position occurred three times.

GAME NO. 68

KING'S FIANCHETTO GAME

Petrosian Donner
White Black

Wins have not been coming frequently to the world champion. This was only his second against as many losses. It was an interesting positional battle, with Petrosian setting up an odd pawn formation on the queen side. It proved to be a good support for the minor pieces.

After weakening Donner's pawns by a judicious exchange, Petrosian developed threats which forced the win of a pawn. In the final position he had various ways to proceed.

GAME NO. 69

RUY LOPEZ

Fischer Unzicker
White Black

Having won four straight games, which incidentally may be a record against grandmasters, Fischer must have felt he had to keep attacking. His sortie with the queen was unwarranted and lost time.

In the ending Unzicker had a decided advantage, with an extra pawn on the queen side far from the two kings. Fischer's blocked passed pawn was almost useless in comparison.

Unzicker won a piece for two pawns, which ordinarily would be enough to win. He could not find a way, however. Fischer's pawns were advanced and safe from attack, and the black king could not get into the fray.

GAME NO. 70

KING'S INDIAN DEFENSE

Najdorf Larsen
White Black

Having just lost three straight games, Larsen still played enterprising chess. He gave up a pawn on the queen side to open lines. He later regained the pawn, retaining a good initiative.

In a time scramble before adjournment, several pieces were exchanged, leading to an even rook ending. That is the way it remained until the draw was agreed.

ADJOURNED GAMES

Three games had been adjourned in the 13th round, and four games in the 14th. One was settled by the players without playing, releasing Portisch. The other nine contestants were involved in the long session Tuesday.

The 14th round games have already been given in full. The earlier games follow.

GAME NO. 61

Larsen vs. Spassky

The only question here was how Spassky would get his rook to the eighth to force the pawn through. It did not take long.

White	Black	White	Black
41 ...	P-R6	43-P-B4	R-Q7
42-B-K4	P-R7	Resigns	

GAME NO. 62

Unzicker vs. Najdorf

Najdorf had a material advantage, and if it were not for that pesky pawn on the seventh, he would have had no problem. Perhaps he should still have won, but his overnight analysis did not bring the answer.

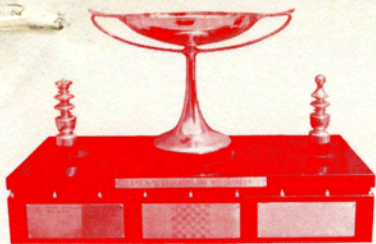

White	Black	White	Black
41-R-QB3	P-R5	45-P-N4	P-N4

44-R-B8	B-B2	48-R-B7	Drawn

GAME NO. 65

Portisch vs. Reshevsky

This was a clear draw, and agreed by the players without resuming. Portisch's sealed move was 41-K-K4.

* * *

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 15

AUGUST 10, 1966

Edited by Isaac Kashdan, Tournament Director

THREE MORE ROUNDS

The standings do not show it clearly, but in effect Fischer is half a point behind Spassky, with three rounds to go. No one else has a reasonable chance for first at this stage.

For the two leaders it will be a real battle. Fischer is on an amazing winning streak. Assuming he wins his adjourned game, it will mean $5\frac{1}{2}-\frac{1}{2}$ for the second round-robin to date. Spassky's score for the same period is a pedestrian $3\frac{1}{2}-2\frac{1}{2}$. Remember that Fischer was in ninth place not too long ago.

Following is the remaining schedule of the players near the top. The player first named has white against those opponents whose names are underlined.

SPASSKY - Ivkov, Fischer, Donner

FISCHER - Najdorf, Spassky, Petrosian

NAJDORF - Fischer, Petrosian, Reshevsky

UNZICKER - Reshevsky, Portisch, Ivkov

What can we make of it? Based on relative scores, Spassky has a much easier schedule than Fischer, and he has undoubtedly been counting on it. If he can score two points, including a draw with Fischer, he is practically certain of first. The American ace would then need wins against both Najdorf and Petrosian to tie. That is most unlikely.

Should Fischer beat Spassky, that is quite another story. It would be Spassky's task then to outscore Fischer in the two remaining rounds.

Obviously the crucial game is Fischer vs. Spassky on Sunday. Get there early, folks. It has never happened before in an American chess tournament, but we may have to close the doors if attendance goes beyond the capacity of the playing room.

People have asked whether we planned to have Fischer meet the two Russians in the final rounds. The answer is no. Numbers were drawn by the players before the tournament started, and the schedule was set accordingly. No script writer could have done it better.

As between Najdorf and Unzicker, who are tied for third and have their own race to consider, Unzicker clearly has the easier schedule, based on the form of his opponents. Whatever happens, Najdorf, the oldest competitor, has done extremely well.

STANDINGS OF THE PLAYERS

Spassky	9 $\frac{1}{2}$	Petrosian	7 $\frac{1}{2}$
Fischer	8*	Reshevsky	7*
Najdorf	8	Portisch	6 $\frac{1}{2}$ *
Unzicker	8	Donner	5 $\frac{1}{2}$ *
Larsen	7 $\frac{1}{2}$ *	Ivkvov	4 $\frac{1}{2}$ *

*One game adjourned

GAME NO. 71

QUEEN'S GAMBIT DECLINED

Najdorf	Spassky
White	Black

Spassky has apparently been pacing himself carefully, holding on to the lead. This was his second successive quick draw.

When Najdorf allowed an exchange which exposed his king, Spassky took the opportunity and played for perpetual check. Najdorf had no good way to avoid it, even if he were so inclined.

GAME NO. 72

KING'S INDIAN DEFENSE

Larsen	Fischer
White	Black

The two most aggressive players in the tournament were matched here. No draw asked or wanted. Fischer, who had lost to Larsen in their first encounter, wanted revenge and also needed to close up the gap between himself and Spassky. Larsen, who was in a slump with three losses last week, wanted badly to get going.

So--the game went along placidly with neither player making headway in the early part. With opposite colored bishops on the board, the draw seemed in sight after all.

The break came when Spassky moved his king forward and got into an annoying pin. Suddenly Fischer's pieces came to life, particularly the rooks on the open king file. In almost no time Fischer had picked up a pawn and Larsen's position fell apart. There was not much left at adjournment.

GAME NO. 73
SICILIAN DEFENSE

Unzicker Petrosian
White Black

Unzicker had a slight plus score and Petrosian was at the 50% mark when the game started. Both ended the same way 23 moves later with not much accomplished. Both Petrosian and Spassky remained in the playing room most of the session, watching the other games intently.

<u>White</u>	<u>Black</u>	<u>White</u>	<u>Black</u>

GAME NO. 74
KING'S INDIAN DEFENSE

Donner Reshevsky
White Black

Reshevsky took a pawn early in the game, and held it through a series of intricate maneuvers. Donner seemed to have adequate compensation, with constant threats against the black pawns.

Reshevsky took far more time in the opening, which is normal for him, and had to race in the later stages. It will take analysis to show just where, but he probably missed opportunities to improve.

At the adjournment material is even. Donner has two connected passed pawns, with his king well placed for support, and has better chances.

GAME NO. 75
FOUR KNIGHTS' GAME

Ivkov Portisch
White Black

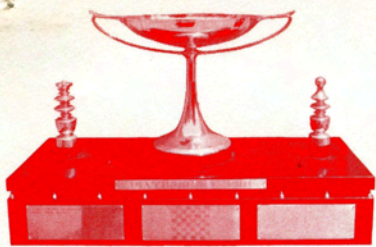

This game witnessed the time scramble of the tournament. After an old time book opening, it became a positional struggle. Ivkov's king was exposed for a time, but there was no direct attack.

Ivkov took most of his time just after the opening, then had several minutes for his last 15 moves. Portisch then began to consume time as well. There were seconds left for perhaps the last seven moves. Neither player could keep track, and they actually made 43 moves before the rapid transit stopped.

At adjournment Portisch was a doubled pawn ahead. The players will now have ample time to assess the prospects.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 16

AUGUST 11, 1966

Edited by Isaac Kashdan, Tournament Director

STATISTICS

For the first time Fischer is at the head of the list, partly because of the alphabet. He and Spassky have the same number of points, but earned quite differently.

Spassky has never been close to defeat. He has four wins and 12 draws, six of them in the second round-robin, with only one of the wins. Fischer had a score of $3\frac{1}{2}$ - $5\frac{1}{2}$ at the half-way mark, but is on a tremendous spurt that has given him $6\frac{1}{2}$ - $\frac{1}{2}$ in the recent rounds.

Now they are matched Sunday, the irresistible Fischer with the white pieces against the immovable Spassky. This is it for both players. Something will have to give, perhaps the laws of physics.

Fischer now has seven wins, followed by Larsen with six. Ivkov has most losses, seven. Larsen is second in that department as well, tied with Donner at five. As a corollary, Larsen has the least number of draws with five. Reshevsky is tops as a drawing master with 14, followed by Unzicker with 13.

GAME NO. 76

KING'S INDIAN DEFENSE

Spassky Ivkov
White Black

Spassky may have been lonely, way up in the standings, and ready for Fischer to catch up. At any rate, this was his third relatively early draw.

Spassky seemed to have the edge all along. In the final position there were chances with his active rook and bishop. Possible was 31 R-N, N-Q2; 32 B-B3, NxP; 33 R-N6.

GAME NO. 77

ENGLISH OPENING

Portisch Donner
White Black

Donner took a pawn after a couple of exchanges, but lost valuable time. Portisch got his heavy pieces in action, and was threatening all over the place when Donner decided to stop.

White	Black	White	Black

10-B-K3	R-K		

GAME NO. 78

NIMZO-INDIAN DEFENSE

Reshevsky Unzicker
White Black

Unzicker's pawns seemed weaker, especially when he accepted the doubled king pawn. His pieces were well placed, however, and he threatened to break through on several occasions.

The players agreed to draw just at adjournment time, after Reshevsky had got over his usual time trouble. It was probably a premature decision on Unzicker's part. He had better chances after 41 ... RxR; 42 QxR, Q-N6, or Q-Q; 43 B-B4, P-K4. The potential passed pawn on the QN file was the key, along with direct threats against the white king.

27-Q-N4	R-K		

GAME NO. 79
KING'S INDIAN DEFENSE
Petrosian Larsen
White Black

This was the second win for Larsen over the world champion, a real feat. It pulled Larsen out of a depression that had gotten him just half a point in his previous five games.

Petrosian has been unrecognizable in this tournament. Coming from a brilliant victory in his title match with Spassky, he had been favored to win, or at least furnish the major contention.

Larsen had more command of space and the better bishop. He gradually moved in on the king side, fixed the targets, then broke through with the final pawn capture.

GAME NO. 80
SICILIAN DEFENSE
Fischer Najdorf
White Black

Fischer moved his minor pieces 13 times in his first 15 moves, which may be some kind of record. Some of the knight moves seemed aimless, but the result was a weakening of Najdorf's pawn formation.

Eventually it meant a pawn for Fischer, which he advanced rapidly, winning an exchange as well. Najdorf tried to resist, but the material was too much.

ADJOURNED GAMES

Three games had been adjourned in the 15th round. Two of them were resolved without further play. Larsen resigned to Fischer in a position that had been clearly hopeless. Donner and Reshevsky agreed to a draw.

GAME NO. 75
Ivkov vs. Portisch

At adjournment Portisch was a pawn ahead. More important was his passed pawn on the queen side, which could tie up a white rook. As the game went Portisch got two connected passed pawns. Ivkov also advanced two pawns, and forced some exchanges, but this only delayed the end.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 17

AUGUST 14, 1966

Edited by Isaac Kashdan, Tournament Director

FINAL ROUND COMING UP

Let us say right off that Fischer and Spassky drew the crucial game, and the suspense is still on. The top prizes and custody of the Piatigorsky Cup will be settled in the final round.

Fischer has black against world champion Petrosian, and Spassky has white against Donner. The bookmaker would have to give the odds to Spassky, but Fischer has been playing great chess and anything can happen.

No position is secure, except that Donner and Ivkov have solidified their hold on the last two places. No one else has any regrets. The other players can still shift quite a bit before the final standings.

At least one record was broken, and that was attendance. Over 900 people were admitted to the tournament room, which was then clearly overcrowded. Many others were turned away. This was the largest audience ever to witness a chess tournament in the United States.

It was a very well behaved group, considerate of the special requirements of a chess event. The noise level was surprisingly low, and disturbance of the players held to a minimum. Two lecture rooms, in one of which the Fischer-Spassky game was the sole subject, helped keep the spectators informed on the finer points of the games in progress.

GAME NO. 81

RUY LOPEZ

Fischer	Spassky
White	Black

From the outset it was clear that Fischer would be going all out for the win, while Spassky would be satisfied with a draw. The Russian ace had the black pieces, and was favored by the final round schedule. He could wait to see what Fischer had to offer.

The Marshall variation should not have come as a surprise. Spassky has played it in important games and is very familiar with its ramifications. Donner had drawn with it against Fischer early in the tournament.

Fischer's 12 P-N3 is unusual, but apparently not better than the normal lines. He held the pawn and did not allow a king side attack. But his development was behind throughout the game. Even with the queens off, Spassky had continuous pressure, ample compensation for the pawn.

STANDINGS OF THE PLAYERS

Fischer	10½	Petrosian	8½
Spassky	10½	Najdorf	8
Larsen	9½	Reshevsky	8

GAME NO. 82

KING'S INDIAN DEFENSE

Najdorf	Petrosian
White	Black

This was only the third win of the tournament for Petrosian, and the second over Najdorf. The games were curiously similar. Both times, after long series of maneuvers, Petrosian gained a slight endgame advantage. Carefully and patiently he made progress until the win became clear.

When the game was adjourned after 40 moves Petrosian was a pawn down. This he had to regain immediately, however. Not long after he was a pawn plus, though Najdorf had counter play. The ending is quite instructive from that point.

In order to complete the game before the final round, it was resumed at 10 p.m. Sunday and finished at 1:30 a.m. Then the tournament director was through and the editor of this bulletin had to take over.

GAME NO. 83
BENONI DEFENSE

Larsen Reshevsky
White Black

Larsen, who must rate with Fischer as a highly erratic performer, had just come out of a bad slump with a fine win over Petrosian. He now has two straight, with not much time to develop this new streak.

It was a difficult game for both players, and the clocks showed it, with seconds left for the last few moves. Reshevsky sacrificed a piece, probably expecting to force a draw by perpetual check, but it did not work out. Analysis will determine whether Reshevsky missed anything in the rapid transit play.

GAME NO. 85

PIRC-ROBATSCH DEFENSE

Donner Ivkov
White Black

Ivkov won a game in the first round, and now in the 17th. It was drab going in between. Donner now joins him in a tie for last place. Donner had scored four points in the first half of the tournament, but only two so far in the second round-robin.

The game seemed quite even until very near the end. Ivkov's superior pawn position and dominating bishop made the difference. The final position was practically a king and pawn ending, with Ivkov's king forcing his way in.

PIATIGORSKY CUP

SANTA MONICA, CALIFORNIA

JULY-AUGUST, 1966

ROUND NO. 18

AUGUST 15, 1966

Edited by Isaac Kashdan, Tournament Director

SPASSKY WINS CUP - FISCHER SECOND

Spassky did it. Steady, consistent, solid play throughout was what it took. Never flustered, never in trouble, the man who had come close to winning the world championship showed clearly that he is one of the great players of the generation.

The man who gave him a tremendous battle against odds, and never stopped trying, was our own champion Fischer. Off to a miserable start, with just $3\frac{1}{2}$ points in the first round-robin, Fischer scored $7\frac{1}{2}$ - $1\frac{1}{2}$ the second time around, a fantastic score in an all-grandmaster event. It was almost enough to win, sufficient to outdistance all but Spassky.

The tables below tell the story. The Cross Table shows the first and second result in each pairing. Totals are given for the first and second round-robins and the final score. The Progressive Round By Round Table shows the score at the end of each round for each player. Note that Fischer was tied for last at the end of the eighth round!

Of the 90 games played, 55, or about 61%, ended in draws. The percentage of draws was even higher in the first half, 30 out of 45. White was far ahead in games won, with 24 to 11 won by black. Here too the first half had a wider disparity, with 12 wins for white against only three for black.

It was a great tournament. The chess world is greatly indebted to Mr. and Mrs. Piatigorsky, who were the sole organizers and sponsors of the tournament through the Piatigorsky Foundation. Some day we will tell the full story of the immense amount of time and effort devoted by Mrs. Piatigorsky in particular to this tournament and in many other endeavors in the cause of chess.

Because of the need of getting this last report out quickly, we will dispense with our usual comments to each game, and say adieu.
