Chess Club Still Alive

The San Leandro High Chess Club is now involved in a round robin tournament for the Northern California title after finishing second in the ACAL league. The only team able to defeat them was Berkeley.

So far, in this tournament, San Leandro has beaten Mt. Eden and Los Altos and lost to Los Gatos. The Pirates were lucky when Berkeley failed to show at their own school for a match. San Leandro will probably get a default for this.

It opened the way for San Leandro and Berkeley, the teams in the lead, to win the rest of their matches. The Pirates will win the round robin with a score of 44 to Berkeley's 42.
