chess

The players in today's game probably never heard of Horowitz' and Reinfeld's book, How To Think Ahead in Chess. But if they had, they would have recognized their creation as a Stonewall Attack with colors reversed.

Played in the current Moscow City Championships (Sovetsky sport, May 31, 1968).

White: B. Gulko. Moscow, 1968.

Black: I. Zaytsev.

17	NyN	RDVN	34 Posions	

(a) White hopes to get a stranglehold on K5, but the execution of his plan is too slow to pose any real problems.

(b) An important check, provoking 7 P-B3 and thereby

interfering with White's planned N-K5.

(c) Preferable is castling followed by P-B4 and N-K5, but White wants to eliminate one of the Black Bishops.

(d) Gaining time to establish an outpost on White's K4.

(e) Note how closely Black's position resembles the Stonewall pattern described in How To Think Ahead in Chess, but with the significant difference that Black's QB is not locked in behind the pawns. The textmove stops 13 N-K5.

(f) If 16 P-B3 to drive away Black's Knight, then 16 BxPch! finishes matters: 17 KxB Q-R3ch! 18 K-N1 QxPch 19 K-R2, and now Black can win material with 19 . . . NxN or

play for mate after 19 ...R-B3.

(g) A serious weakening. There was no need to fear 21. N-N5, as after 22 BxN RxPch 23 RxR RxRch 24 KxR

(h) Or 23 BxN? RxPch! and 24 . . . QxPch.

(h) Or 23 BxN? RxPch- and 24 . . . QxPch.(i) Of course not 26 QxP? QxR. White's last futile gesture relieves some congestion in return for a Pawn.

(j) Threatening mate in three with 30 . . . QxRPch.

(k) The crusher!
