ADDISON REPEATS AS CALIFORNIA STATE CHAMPION

William G. Addison of Los Angeles retained his state title in November at the Herman Steiner Club, his 7-2 score being $1\frac{1}{2}$ points a head of the runner-up, Ray Martin of Los Angeles. Addison recovered after a first-round loss to Leo Kupersmith to win six games and draw two, against Martin and John Blackstone.

Martin was second by half a point over Walt Cunningham of Arcadia and Norris Weaver of Berkeley. There were only $1\frac{1}{2}$ points between second and ninth places., as there were ties for third and fourth, fifth and sixth, and seventh, eighth and ninth places. There were ten finalists, six from the South and four from the North.

CALIFORNIA STATE CHAMPIONSHIP, NOVEMBER 1963

10. Max Wilkerson	0_	0	0	0	0	$\frac{1}{2}$	0	0	1	X	$1\frac{1}{2} - 7\frac{1}{2}$

The State Championship was the culmination of several qualifying tournaments, advancing eight players to the finals plus the California Champion and the Open Champion, who were seeded. The tournament was directed by Gordon Barrett.

MRS. GREGOR PIATIGORSKY WINS STATE WOMEN'S CHAMPIONSHIP

Mrs. Gregor Piatigorsky outclassed nine opponents in a revival of the California Women's Championship, held at the Herman Steiner Club simultaneously with the men's tournament. It was a five-round Swiss, and Mrs. Piatigorsky scored 5-0. Tied for second and third places $1\frac{1}{2}$ points behind were Mrs. Burlingame and Mrs. Grumette, who lost their games to Mrs. Piatigorsky and drew against each other.

NORTHERN CALIFORNIA QUALIFYING TOURNAMENTS by Roy Hoppe

The three players from the San Francisco area who qualified for the State Championship were Roy Hoppe of Novato, College of Marin student, Norris Weaver of Berkeley, Minnesota state champion, and John Blackstone of Saratoga. The fourth finalist from the North was Max Wilkerson, San Francisco artist and former New Mexico state champion, who qualified in the Central Valley tournament at Sacramento.

The first two qualifying tournaments were held at the Mechanics' Institute in San Francisco and were directed by Charles Savery:

EARNEST WINS SAN GABRIEL VALLEY OPEN

by Gordon Barrett

John Earnest and Neil Hultgren tied for first place in the October tournament held at Pasadena and took first by the slender margin of $14\frac{1}{2}$ tie-breaking points to 14. Earnest is a well-known expert in eastern chess circles, though not too active in tournaments. Usually we meet him on one of the top boards of the formidable Jet Propulsion Laboratory team at team tournament time. A. Larsen, many time winner of this event, finished in a tie for third place with C. Chrones.

^{*}Parker won from a player who withdrew after the first round.

Konjovic entered the tournament the second round.

PYE WINS WHITTIER AMATEUR OPEN

Frank Pye of Downey beat out John Postma, also from Downey, on tiebreaking points in the Whittier Amateur. The two players scored $5\frac{1}{2}-1\frac{1}{2}$ in the 7-Round Swiss and the tie-break was $21\frac{1}{2}$ to 21. Pye, a leader in the development of chess interest in Downey, has been somewhat active recently and is making a great come-back.

Pye and Postma shared 1st and 2nd prizes totaling \$52.

CALIFORNIA JUNIOR CHAMPIONSHIP APPEAL - A REPORT

Last June, in the California Junior Championship, a game Roy Hoppe vs. Steve Rains was called a draw because the tournament director felt that he had not given Rains a chance to lodge a claim of threefold repetition of position during the play. Hoppe, who was ahead material when the game was stopped, appealed the verdict to the CSCF and it was put to the Tournament Committee. In order to clarify the matter and assist tournament directors in future occurrences of this kind, we now give the circumstances as sent by mail to the members of the Tournament Committee, together with their verdicts.

To our best information, Hoppe repeated the position three times during a time scramble in the last round. Rains asked the Tournament Director, Jerry Hanken, a question regarding the draw but made the claim improperly, either because of ignorance of the rules or because of extreme shortness of time on his clock (or both). Hanken told Rains to move, because he was short of time, instead of responding as if a claim of draw had been made officially.

Parenthetically, the claim of draw must be made on your own time when you are about to make the move that repeats the position for the third time. It is not sufficient, legally, to merely repeat the position and then make the claim. It is also necessary, according to the rules, to be able to support the claim by means of a reasonably accurate score sheet. However, for this tournament some of the technicalities had been waived by prior announcement, including that of the score sheet.

Soon after the incident, perhaps within a move or two but impossible to determine at this late date because neither player kept up his score, Hoppe's flag fell - and almost immediately after, Rain's. The tournament director stopped the clocks and attempted to reconstruct the game. Since the tournament was played at the Steiner Club and Hoppe was from San Francisco, there were naturally many kibitzers who desired to prove that Hoppe had lost on time. These persons were vociferous, and so hindered Hanken's task that it was very late by the time that he established that approximately 52 moves had been made. Dinner now was approaching, so Hanken awarded the win to Hoppe by adjudication.

Some time later, CSCF president and international arbiter Isaac Kashdan entered the room and was immediately requested by Mrs. Piatigorsky, club president and sponsor of the tournament, to give an

opinion about the repetition of position. Not realizing that the matter had just been ruled upon and that it was being kept alive, he replied at once: "Of course the game should be a draw. When Rains asked about a draw, he should have been told how to make the claim properly." On hearing this, tournament director Hanken reversed his decision and declared the game a draw.

Hoppe's appeal was made both to President Kashdan and to Guthrie McClain, chairman of the board of directors. Kashdan felt that he was involved, so asked that McClain put the question to the Tournament Committee.

In his appeal, Hoppe did not ask for a prize, which he might have won if he had won the game. He asked only that his rating not suffer, mainly because he was close to a Master's rating and thought he might have an opportunity to play on the U.S. StudentTeam in international competition, for which a rating of Master is required.

There were twelve members to be consulted, of whom two, Kashdan and Hoppe, were taken out of the voting. Of the remaining ten, there are now seven responses, and because two members have now left the State, this will be considered final.

The voting was not strictly along North vs. South lines: the four votes in favor of a win for Hoppe (the vote to finish the game from the adjourned position can be considered a vote for a win) were divided two and two; the two votes for a draw were from the South; and the compromise vote was from the North.

The compromise vote won out. Hoppe agreed to have the matter put to the USCF rating statistician with the request to re-figure his rating as if he had won the game. Rains' rating will not be changed. This solution may not satisfy everybody, but it seems to us a satisfactory way to settle

a difficult situation, particularly in view of the elapsed time since the tournament (June, 1963).

What lessons have we learned from this? First, international arbiter Kashdan has taken the position that the tournament director should have satisfied Rains' plea, inarticulate as it may have been. From this we may take the view that the tournament director is not a bystander nor a Supreme Court Justice aloof from the common mob - but rather an active help to the players, ready to step in when he is wanted (and perhaps at other times; we invite Mr. Kashdan to suggest when he should butt in and when he should butt out!) We also learn that when you waive the necessity to keep a score sheet, or any other details called for in the laws of chess, you may get into trouble. Several members of the Tournament Committee doubted the legality of this.

In our account of this tournament (Vol. XIII, #1) we left out the cross table. For the record, here it is unchanged:

CALIF, JR. CHP, 1963	1	2	3	4	5	6	Score

GAME OF THE MONTH

The first round of the California State Championship produced a surprising upset when Leo Kuppersmith beat the obvious favorite, Bill Addison. The game is no fluke. Black hung on to the extra pawn, and then converted his advantage into a final mating attack. It is to Addison's credit that he bounced back from this disastrous start to win the tournament in a walk.

HENRY KING

Henry King, a familiar face to Northern California players for many years, died recently after a long illness.

Henry was a member of the Golden Gate Chess Club of San Francisco, and played regularly in the league matches. His occupation made him a natural for the lettering of tournament lists and displays for such events as the North-South match.

Henry is also well-known to players across the country as the inventor of the 'King-Board' -- a limp plastic board that rolls into a container. He silk-screened these boards in his own shop and supplied them with the player's name hand-lettered on the border.

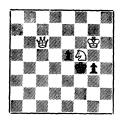

TASKS:

TASK No. 213

V. Korolikov and A. Troitzki First Prize, PROBLEM, 1957 Stipulation: Is the position legal? In other words, is it possible for the White King to get where he is without stalemate? How? Note that, first of all, one Black Rook is the result of a promotion which required several captures of White men.

TASK No. 214

L. H. Jokisch
Nashville American, 1888
Mate in three*
'In form and feature, face and limb,
I grew so like my brother,
That folks got taking me for him,
And each one for the other.''
-Henry Sambrooke Leigh

*As suggested by B. G. Laws, move all the pieces one file to the left, and again it is Mate in Three.

This month we present problems slightly out of the ordinary. The "retrogate analysis" problem is simple, and worthy of the study. We guarantee you it won't help you to play the middle game.

No. 214 is from the Dutch book mentioned last time, "Citaat-Problemen", which includes 96 problems of specific interest, with appropriate quotations. Dr. Niemeijer, the publisher, combines a good deal of humor with some outstanding selections of all types of problems. It need not be mentioned that the moving of the pieces to the left produces a different solution; unlike many such "twins", this problem has a solution which is also entirely different in all variations.

(The Niemeijer book mentioned above, as well as his "Goethart Problems", "Loshinsky & Hartong Problems", "Hannemann Problems", and "Scaecvaeria" (another diverse collection) are available from the Reporter for \$1.50 each. They were received on exchange for "Sheppard Two-Movers", published by the Reporter last month at the same price.)
