CALIFORNIA OPEN SETS RECORDS

State Champion Kim Commons of Huntington Beach won the California Open over the Labor Day Weekend and in so doing he set a record. He scored a 7-0 shutout for the first time in the 23-year-old history of the event. In past years the winning score was often 6-1. Every now and then it was $6\frac{1}{2}-\frac{1}{2}$ and whenever a player made a $6\frac{1}{2}-\frac{1}{2}$ score he always won outright. This year, however, Jim Tarjan scored $6\frac{1}{2}-\frac{1}{2}$ and was only second.

Those winners of the past with $6\frac{1}{2}-\frac{1}{2}$: Herman Steiner, 1954; Zoltan Kovacs, 1960; Stephen Sholomson, 1961; Walter Cunningham, 1962; Jerome Hanken, 1964; Irwing Rivise; 1966, and Tibor Weinberger, 1970.

When Commons set the record he had a large audience, for Ventura set another record - 213 contestants. The Ventura County Chess Club did it all. This is the same bunch that set the previous California Open record of 166 in 1970 and the U.S. Open record of over 400 in 1971!

COMMONS CALIFORNIA OPEN CHAMPION AT VENTURA

Kim Commons of Huntington Beach, 21, won the California Open over Labor Day by a perfect score of 7-0 ~ the first time since the Open began in 1950. Commons is also the reigning California State Champton.

Commons and John Grefe of Berkeley set the pace for six straight rounds, and in the last round Kim drew the White pieces and won handily. Grefe had to settle for a tie for third place, as James Tarjan of Berkeley (and Sherman Oaks,) finished second with $6\frac{1}{2}-\frac{1}{2}$, good enough to win most California Opens.

Tied with Grefe were Tibor Weinberger of Santa Monica, Robert Zuk of Surrey, B.C., Ronald Gross of Cerritos and Ed Kennedy of Hemet. Gross and Kennedy shared the expert prize. Gunnar Rasmussen of Vallejo chairman of the Board of Directors of the CSCF, won the Class A prize with a score of $5\frac{1}{2}-1\frac{1}{2}$. Arnold Kakimi (Ben's son) of Monterey Park won Class B. There was a tie in Class C between Vignar Ahmed of Orange and Ray Fisher of San Bernardino, $4\frac{1}{2}-2\frac{1}{2}$, and a tie in Class D with the same score between Douglas Deitel of Hollywood and Robert Hurdle of Reseda. Diane Sevareide of Culver City won the lady's prize and William Tomlinson won the Unrated prize.

There were 213 contestants, the largest California Open in history. The prize fund was \$1,700. The tournament director was Gordon Barrett who would have been lost without the expert assistance of his two daughters. (The scheduled tournament director was grandmaster Isaac Kashdan, but he was still involved with news reports and analysis of the Fischer-Spassky match and could not get away.)

Organization of the California Open was by Harold Sanders and his wizards in the Ventura County Chess Club, the same group which put on the U. S. Open in 1971 and set a record of 400 contestants.

WILCOX WINS STAMER MEMORIAL OPEN AT MECHANICS' INSTITUTE

Rex Wilcox of Salinas and San Francisco won the 1972 Arthur B. Stamer Memorial tournament by a 7-1 score over a strong field. Wilcox lost one game, to Tom Maser in the third round, and won six. In the last round he defeated the redoubtable Jim Tarjan of Berkeley.

Five players tied for second place: Ken Smith of Dallas, Larry Gilden of New York and Berkeley, C. Bill Jones of Texas and Redwood City, Jim McCormick of Seattle and Berkeley, and Romeo Rodriguez of San Francisco. There were class prizes for Expert A, B, C-D, Unrated, Senior and Junior. The total prize fund was \$1,500 plus the augmented sum because of the large attendance. There were 116 contestants and the tournament was directed by Alan Benson.

WILCOX, FRITZINGER, MC CORMICK TIE IN MONTEREY INTERNATIONAL

Rex Wilcox of Salinas, Dennis Fritzinger of Berkeley and James McCormick of Seattle tied for first place in the Eighth Annual Monterey International Open, held at the Casa Alvarado, June 24-25, 1972. All three players had perfect 5-0 scores. Their prizes were \$143.50 each and Wilcox won the trophy on tie-breaking points.

The total prize fund was \$1,060 and there were nine trophies: lst, Wilcox; Expert, Richard Bustamente of Salinas; Class A, David Sewell of Salinas; Class B, Felix Villarreal of Mexico; Class C, William Baker of San Francisco; Class D, Michael Kunz of Visalia; Unrated, Dan Mayers of England; Junior, Barry Nelson of Los Angeles; Woman's, Nora Harris of Berkeley. There were 132 contestants and the tournament director was Ted Yudacufski.

MC CORMICK, BARNES TIE IN EAST ASIA MASTER TOURNAMENT by Alan Benson

The East Asia Masters Tournament was held June 11 - 25, 1972 at the East Asia Book & Game Center, 5897 Gollege Avenue, Oakland, California. The tournament was sponsored by Gary Grady and Bill Lamb, the owners. The tournament organizer was John Grefe, and Alan Benson directed.

The tournament began with eight players, however, Gary Pickler and Alan Benson were only able to compete in one game each. 40 moves within $2\frac{1}{2}$ hours was the time limit allowed, followed by 16 moves per hour thereafter. The lighting, the quiet, and the good attitude of the players combined to effect an excellent tournament.

East Asia Book & Game Center has the latest chess books in stock including the most recent publications mentioned in Chess Digest. They carry a large supply of chess sets and equipment as well as a substantial array of Go books, Go sets and mathematical puzzle books. Hours are 11 a.m. to 6 p.m. weekdays and 10 to 6 on Saturdays.

GREFE CENTRAL CALIFORNIA CHAMPION

John Grefe of Berkeley won the Central California Championship at Berkeley by the score of 4-0. Tied for second were David Amkraut of Palo Alto and Dr. Ira Pohl of Santa Gruz, who shared the Expert-Class A prize. Karsten Henkel of Berkeley and Steven Joplin of Hayward tied for the Unrated prize. In the Amateur Section: Class B, Ronald Byrne, San Francosco; Francisco DeSilva, Stanford; Charles DeVine, Fairfiëld; and Kevin Olwell of Walnut Greek; Class C, a six-way tie; Dana Cowles, Peter Freier, Vincent Hikida, Ricard Winton, Stewart Katz and Dan Pearce; Class D-E, Igor Gritzai and Richard Paige; Unrated, Stephen Jenkins and Gilbert Jorgenson.

There were 152 contestants. The total prize fund was \$912. Martin E. Morrison directed, assisted by Elwin C. Meyers.

WEST COVINA TOURNAMENTS by David Argall

Don Bicknell added the West Covina Summer Rating Chess Tournament to his long list of tournament victories. The heavy favorite from the start, Bicknell won all his games to socre one of the most decisive victories in West Covina Chess. It is a rare tournament where the winner can boast of a point and a half lead at the end.

All alone in second was David Argall with $4\frac{1}{2}-1\frac{1}{2}$. Argall missed the first round, but managed to make up most of the lost ground. Third was shared by Estan Saldana, Lyle Oje and Lowell Swisher, all with 4-2. Oje thus earned the B prize as well while Swisher won the G prize. The D prize was split by Gregory Jones and Dale Schenk, each with $3\frac{1}{2}-2\frac{1}{2}$. Worthy of note was William Smith's performance, 5 draws in 6 games, a true drawing master. Jerry Payne directed the 26 player event.

WEST COVINA AUGUST ACTION

Playing in Léisurely fashion, Marshall Neuss won the 2nd West Covina August Action Chess Tournament. The favorite from the start, Neuss allowed 3 draws, but was undefeated.

Some of Neuss' toughest competition was eliminated by withdrawals. Margaret Dickson, a newcomer from Pennslyvania was 3-0 when she withdrew while Lowell Swisher was $3\frac{1}{2}-\frac{1}{2}$. Alan Long and Shawn Aegerter shared the C prize when they drew their last round game with each other. Matt Marcella won the D prize. All scored 3-2. David Argall directed the 14 player event.

ERVIN HAYWARD C.C.C.A. REGIONAL CHAMPION

Roy Ervin came up from Van Nuys in August and captured first prize in the Hayward Class Tournament with a perfect score of 4-0. Tom Dorsch of Davis was second, 3½-½ and Arthur Wang of Oakland, Alex Suhobeck of Monterey and Kon Grivainis of Concord (recently returned from South Africa) tied for third.

First prize was \$125 and the total prize fund was \$695. Martin E. Morrison directed, with assistance from Elwin Meyers.

GAME OF THE MONTH

Philip D. Smith of Fresno is one of the old Pros of California Chess. He first played in Statewide competition (to our knowledge) in the 1938 North-South team match. He played for the South team at first, later played for the North and then settled down in the center of the state where he played for the side which was short.

On a vacation this July, Smith played in the South Carolina Open in Beaufort and wound up in a four-way tie for first. He played the following game in the second round against Charles Walter, a former South Carolina champion although still in high school.

Game No. 1223 - Sic	ilian
White	Black
P. Smith	C. Walter
(notes by Phil	Smith)
1. P-K4	P~QB4
2. Kt-KB3	P-Q3
3. P~Q4	PxP
4. KtxP	Kt-KB3
5. Kt-QB3	P=QR3
6. B-KKt5	P=K3
7. P-B4	B-K2
Other seventh moves	for Black ar
Q-B2, QKt-Q2, P-R3,	P-Kt4 and Q-

re Kt3.

8. Q-B3 Q-B2 Not only to prevent 9. B-B4 but to adopt the Paulsen variation setup; if 8...QKt-Q2; 9. B-B4! Q-B2; 9. BxKP!, PxB; 10. KtxP, Q-Kt3; 11. KtxPch, K-B2: 13. Kt-B5 with a crushing attack (Fischer). or 9... ,0-0; 10. 0-0-0.

9. 0-0-0 QKt-Q2 If 9...P-QKt4?; 10. BxKt, KtxE;11. BxPch (Gligoric) 10. P-KKt4

This may be too bold. In the 1971 U.S. Open Evans vs. Reshevsky went also bold, as it can involve a queen queen-side counter-attack after sacrifice: 10.B-K2, P-Kt4; 11. BxKt, Fischer's 13...R-QKt1! By this KtxB; 12. P-K5!?; B-Kt2; 13. FxKt!? Pawn offer White often gets the (or Q-Kt3), BxQ; 14. BxB, BxP; 15a BxR, P-Q4; 16. BxP, BxKt; 17. RxB, PxB; 18. KtxQP, Q-B4; 19. R-Klch, K-Bl. Other tenth moves for White played by masters are B-Q3. BxKt, and Q-Kt3, but 10. P-KKt4 seems thematic.

10. ... P-QKt4 11. BxKt P-QR3 and B-Kt2 have also been tried by White here.

11. ... KtxBThe bishop cannot capture because

of 12. BxP: but formerly popular was 11..., PxB, Chess Informator 11/400 may have the last word on this line or the latest: 12.P-B5, Kt-K4 (if 12...F-Kt5; 13. PxP, PxKt; 14. PxKtch, BxP; 15. P-K5, R-QKt1; 16. PxBP, RxP; 17. R-K1--or if 16...B-KB1; 17. P-Kt5; RxP; 18. B-R3, Rx RP; 19. Kt-Kt3, etc. or if 15...Q-Ktl; 16. QxQBP, either PxP; 17. Kt-B5, BxKt; 18. PxB); 13. Q-R3, 0-0 (Chess Archives gives: 13...P-Kt5;14. Kt(3)-K2 & 15.Kt-B4 is good for White); 14.0-R6! (Better than Gligoric's 14.P-Kt5 of Fischer's Kt(3)-K2, K-R1; 15.P-Kt5! R-KKt1! (Fischer's move); 16. P-Kt6, BPxP; 17. PxKP (Bobby wrongly favors KtxKP), B-Kt2; 18. Kt-Q5 (Not given by Bobby), BxKt; 19. PxB, Q-B4; 20. B-Kt2, and White is better. After 13. Q-R3, Fischer says: "Not 13..., B-Q2; 14. P-Kt5! PxKtP; 15. PxP, PxP; 16. KtxKP, and Black's game collapses."

12. P-Kt5 Kt-Q2 13. P-B5

13. Q-R3, Hort-Gligoric, 1971, did not turn out well.) 13. P-QR3 is 10. B-K2, but this line, introduced often played, even by grandmasters, in a Keres -Fischer game in 1959 is but it creates a target for Black's initiative while P-QR3 may result in Black getting it. A third choice, 13.B-R3 did not turn out well in Smyslov-Fischer, 1959. Fischer has won more than one game vs. P-QR3.

13. ... Kt-B4 The "book move," but 13...BxPch is not as bad as Chess Archives, O'Kelly's book on this defense, and other sources = y. In a tourney game P. Smith vs. Mike Mills, Fresno, 1971: Smith played 14. K-Kt1, Kt-K4; 15.

Q-R5, B-K2; 16. PxP, 0-0; 17. Kt-Q5, 20. QxP is a blunder: 20...B-Q-Kt2; 18. Kt-B5 and quickly won. But R3ch! 21. K-Kt1, B-K1; 22. RxB instead of 15...B-K2; both 15...Q-Q1 ch, RxR; 21. Kt-B6ch, QxKt, and and Q-K2 have been tried by Najdorf in South America, one game vs. Browne. Opening analysts and Chess Informator have neglected this possibility. Can Black hold his own? Chess Archives gives 13...BxPch; 14. K-Kt1, Kt-B4 (instead of Kt-K4); 15. BxPch, PxB; 16. Kt(4)xKtP, 'with a strong attack for White," according to Pachman, but if 16...Q-K2; 17. KtxQPch, K-B1 the "situation is not very clear." or 15. PxP, BxP; 16. KtxB, KtxKt; 17. P-K5, 0-0; 18. PxP, Q-Kt3. O'Kelly favors 15. BxPch, PxB; 16. Kt(4)xKtP.

14. P-B6

Matulovie tried 14. P-Kt4? against Masic and lost. Tatai gives other 14th moves: R-Kt1, B-R3 and PxP, PxP; 15. B-R3 in Chess Archives -none fared well.

14. ... PxP 14...B-Bl is a blunder; 15. BxPch. 15. Px₽ B-B1 16. Q-R5

An improvement over the formerly favored 16. B-R3. Several Chess Informators show the difference is that after 16. B-R3, P-Kt5! the sacrifice 17. Kt-Q5 may not be sound (Fischer has defeated it), while after 16. Q-R5:, P-Kt5(?); 17. Kt-Q5! is very good, Parma claims a win for White. After 17. Kt-Q5!, PxKt; 18. PxP, B-Kt2; 19. B-R3 wins -- or if 18...B-Q2; 19. R-Klch, K-Q1; 20.K-Kt1:--or if 18... Kt-Q2;19.B-R3, followed by Kt-K6 and/or KR-Kl. Zuckerman gives: 18. ..B-Q2; 19.R-K1ch, K-Q1;20.K-Kt1! Q-B1;21. QxPP, K-B2; 22.B-R3, K-Kt 3; 23.BxB, but 22. Kt-K6ch may be better than B-R3. (But

Black wins (Zuckerman).

16. ... B-Q2

17. P-QR3

Although played by Matulovic and praised by Sokolov, a dubious move, as Zuckerman shows: 17...R-KKt1!; 18. QxRP, R-Kt3; 19. Q-R4, 0-0-0; 20. K-Kt1, B-R3; 21. Kt-B3, B-B3. Correct is 17. B-R3, the thematic move, at once, P-Kt5; 18. Kt(3)-K2!, 0-0-0; 19. QxP, B-R3ch; 20. K-Ktl, QR-B1; 21. Q-R5, RxP; 22. KR-B1, KR-B1; 23. RxR, RxR; 24. Q-R4, R-Kt3; 25. Kt-B3! White's advantage. If Black plays 17...0-0-0?; 18. QxP:, B-R3ch; 19. K-Kt1, QR-B1; 20. Q-R5!, RxP; 21. P-K5!!, PxP; 22. KtxKP with a plus.

> 17. ... 0-0-0?

18. K-Kt1:

Given the exclamation by Zuckerm an. Worse moves played by masters are 18. P-Kt4? (Matulovic) and 18. QxP (Ribli-Bukic, 1970).

> 18. ... B-K1 19. B-R3 K-Kt1 20. KR-B1 R-B1 21. Kt-Kt3 KtxKt

Q-B4

22. PxKt 23. Kt-Q5!!?

I felt my opponent would get an advantage if he ever got in P-Q4, and this is the thematic move to stop it.

23. ... Q-B7ch 24。 K-R2 0xKP I.was more worried over 24... QxRP and also 24...PxKt; 25. R-B1 (seemingly better than 25. BxR, QxB; 26. QxQP, Q-B3), QxR;

threat of 28. P-K5 is hard to meet, certainly not by 27R-Kt1: 28. RxB 29. B-Kt2!	~ .

MISTAKES BY OPENING AUTHORITIES by Phil Smith

(Note: This new column will concentrate on mistakes in opening analysis by modern authorities.)

COLUMN I -- The Exchange Variation of the Gruenfeld Defense

I -- INTRODUCTION: Since Ernst Gruenfeld introduced this famous opening into international chess against Dr. Alexander Alekhine at Vienna in 1922, the Gruenfeld has become very popular. William Hartston says that it was introduced before its "parent," the King's Indian Defense, was properly developed and "for some years Gruenfeld's 3...P-Q4 was considered the only satisfactory manner in which to handle the King's Indian Defense." Hartston says that it was not for many years that it was found that White can successfully maintain his center in the Exchange Variation and that this line "became established as one of the most feared counters of the Gruenfeld. At the present time it remains a dangerous weapon, as Spassky and Gligoric especially have shown...However, Black has a number of essible plans at his

disposal, and analysis indicates that he should secure satisfactory prospects." One of the leading practitioners of the Gruenfeld has been Bobby Fischer, but he avoided it and the King's Indian in his match with Spassky; perhaps Fischer preferred safer lines in a match and would save the Gruenfeld for tournaments. At any event, the Gruenfeld is a good line for weekend tourneys if not for world championship matches.

II -- The Mistake in Analysis of the Exchange Variation:

It is notorious that opening experts and sources like Chess Archives, Chess Informator, Ludek Pachman and Isaac Boleslavsky - to say nothing of Modern Chess Openings - often copy each other's opinions without critical analysis to determine how sound they are - and consequently several of them sometimes perpetuate the same mistake. In opening study it isn't always safe to consult several sources, for they all may be wrong, as Fischer has shown many times. Pachman wrote an article on the Exchange Variation of the Gruenfeld for the July, 1971 Chess Life & Review in which he gave this line: 1. P-Q4, Kt-KB3; 2. P-QB4, P-KKt3; 3. Kt-QB3, P-Q4; 4. PxP, KtxF; 5. P-K4, KtxKt; 6. Px Kt, P-QB4; 7. B-QB4, B-Kt2; 8. Kt-K2, Kt-B3; 9. B-K3, 0-0; 10. 0-0, Q-B2.; 11. R-B1, R-Q1; 12. P-KB4, B-Kt5; 13. P-B5, PxBP; 14. BxPch., KxB; 15. Q-Kt3ch, P-K3; 16. Kt-B4, Q-Q2.; 17. KPxP, Kt-R4.

18. PxPch! (All of these exclamation marks are Pachman's...but this one should be a double question mark.) K.-Kt1; 19. PxQ, KtxQ; 20. PxKt, PxP; 21. BxP, BxBch; 22. PxB, RxP; 23. P-Q5. Then Pachman comments: "White keeps his extra pawn, but he has no real winning chances because of Black's Queenside majority."

His line, with many of his notes omitted here, was a colossal blunder in analysis, but it led a master, Dr. William Batchelder, to play it against the writer of this column in

the San Bernardino Open of July, 1971. Unfortunately, for Dr. Batchelder, Pachman was very much wrong. I had played the line many times in skittle games in Fresno with Rod Bobo and Dr. Walter Stuart and I had been puzzled by the Pachman article. I tried Pachman's line in its entirety against Bobo in a 30-30 game and had much difficulty in drawing. Then I remembered that I had seen a different opinion on this line several years earlier both in Chess Digest and a more original source, Schahmatny Bulletin. Two days before I left for the tournament I found the 1968 issues of both periodicals and rediscovered Pachman's mistake. To my joy and amazement Dr. Batchelder played Pachman's line against me and we reached the 18th move PxPch?? (not!--Pachman). The right move, by the way is 18. QxPch, as Spassky played against Shishin in Tallin in 1959-- but more on that later. Of course, I replied with

the refutation T had found that same week, 18...BxP: and not Pachman's very inferior 18...K-Kt1? This was before T had obtained Hartston's book (see bibliography) or his articles in Chessman Quarterly in 1970. Hartston very accurately covers this hazardous line for White. Dr. Batchelder had played very rapidly up to this point, but now he took an hour for the next move. 19. Q-R3. He saw that his planned 19. KtxB dis. ch. leads to a loss for White after 19...K-Kt1! (J. Littlewood vs. Hartston, 1970, continued 19. QxBch, QxQ; 20. KtxQ dis. ch, KxKt; 21. QR-K1, K-Q4!; 22. R-B5ch, K-B3, with a plus for Black.) The Batchelder-Smith game continued 19...Kt-B5; 20. KtxB dis. ch., K-Kt1; 21. Q-Kt3, QxKt; 22. QR-K1, Q-Q4; 23. B-B4, R-Q2; 24. PxP, QxPch; 25. B-K3, Q-B3; 26. BxP, K-R1; 27. B-Q4, Kt-Q7 and Black won.

Pachman's bad blunder was perhaps copied from Chess Archives, which had the same mistake in its English version, at least, for Jan. 1967, 7t, Serial 5, No. 407, and even recommended 16...R-Kl in place of the much better 16...Q-Q2. Pachman showed what is wrong with 16...R-Kl? White recovers the piece by 17. P-KR3, Kt-R4; 18. Q-R4. After 16...Q-Q2:; 17. P-KR3 is no longer good, for Black can play 17...PxQP; 18. PxQP, KtxP, etc. But Pachman may have secured his mistake analysis from Boleslavsky's book on the King's Indian and Gruenfeld, which in its German edition had the same error on page 253.

III. -- The correct Line for White:

White should play 18. QxPch. Various opening analysts claim that Black still gets an advantage -- not necessarily decisive-- but this claim is open to challenge and a better judgement appears to be that the resulting position is unclear - and either side might win, or the game might result in a hard-fought draw. However, it may be that White should vary earlier and not get into this line nearly as far as 18. OxPch. Hartston and Pachman think that on the 12th move the best for White is 12. Q-K1 as Spassky played versus Fischer in Santa Monica in 1966, but more on that later. First, I will examine 18. QxPch, QxQ; 19. KtxQ, PxP! (In Spassky-Shiskin, or Shishkin, Black lost rapidly after 19...Kt-B5?; 20. B-Kt5, R-KKt1; 21. R-B4, etc. But Black can play 19...B-B3:; 20. KtxRch, RxKt, Larry Evans in MCO, 10th.) 20. KtxRch (or 20. PxP-- see below.), RxKt; 21. PxP, Kt-B3. Estrin, Pachman and Boleslavsky claim Black stands better, but Hartston seems more accurate in saying: "with equal chances." Most analysts stop here, but after my game in San Bernardino I analyzed the line briefly with several masters, and Ross Stoutenborough suggested a possibly good move for White, 22. P-B6!? I first tried 22...B-R1 (of course, 22... BxP? is bad after 23. B-Kt5, R-Q3; 24. P-Q5 or R-B4). but Black came out second best, so 22...B-Bl is correct, ..g.: 23. F-KR3, B-K3; 24. R-KB2, R-Q2 (not 24...KtxP?; 25. R-B7ch, e :.); 25. QR-Q1. B-QKt5. (not 25...B-B4?; 26. K-R11; KtxP? or BxP?; 27. R(2)-Q2 wins for White.) After 25...B-Kt5: White cannot protect all of his pawns, but possibly he can play better earlier (however, 24. R-KB2 is certainly better than 24. F-R4?). Nevertheless, 22. P-B6 seems inadequate. best is 22. P-KR3, B-K7; 23. R-KB3, B-Q6 (best, I think); 24. R-Q1, B-K5; 25. R-B4, B-Q4; 26. R-B2 or if 24...B-B5; 25. R(2)-Q2, B-Q4. In either version this line seems about even and White appears to be able to protect all his pawns. But Black's continuation may be easier to play than White's, so probably White should avoid the entire line, possibly on the 12th move. To revert to 20. KtxRch, White can also play 20. PxP, when Pachman says Black should play 20...R-Q2; 21. QR-K1, K-Ktl. But Estrin in Schahmatny Bulletin (translated into Chess Digest also), gives 20... KR-QB1, which seems best. In both Chessman Quarterly and his book on the Gruenfeld, Hartston and his proofreaders appear to have overlooked a typographical mistake, when Hartston gives 20... QR-B1 (instead of 20...KR-B1); 21. Kt-Kt5ch, K-Kt1; 22. RxR, RxR; 23. P-B6, B-R3; 24. P-B7ch, K-Kt2; 25. P-Q5, K-Kt3, With advantage to Black." I think the 20th move is a "typo", for Boleslavsky has the same line as Hartston with the King's rook moving. (to be continued).

DIRECTORS " MEETING, CALIFORNIA STATE CHESS FEDERATION

A special meeting of the Board of Directors was held at B.J.'s Restaurant in Ventura on September 3, 1972. Chairman Gunnar Rasmussen called the meeting to order at 8:50 P.M.

Directors present were Gunnar Rasmussen, Gordon Barrett, David Argall, Guthrie McClain, and Harold Sanders. Also present were President Isaac Kashdan, Irving Rivise and Frank Harris.

The minutes of the previous meeting were read by temporary Secretary Irving Rivise.

The report on Standing Rules which had been distributed in August by S. H. Van Gelder, Secretary, was read and discussed. It was moved and seconded to strike out Rule No. 2, dealing with the California Champion and the U. S. Championship as being out of date. Motion passed, subject to approval of the full Board.

David Argall gave a report on a proposed method of giving Calpoints to a tournament based upon the rating point strength of the tournament. It was decided to recommend this system to the full Board.

A discussion on whether or not Calpoints can be transferred from areato area resulted in a motion by Mr. McClain that only certain designated tournaments can award transferable Calpoints. Motion carried.

It was decided that tournament directors of Calpoint tournaments should be required to submit a cross-table to the CSCF. It was decided that Calpoint fees should be $20\rlap/e$ per point, with a \$1 minimum. (These decisions, and also the motions, are to be subject to the

decision of the entire board, which numbers 15 members, because there were not a quorum present.)

It was reported that the 1973 California Open would probably be held in Monterey, subject to working out details, and that the 1973 Class Championships and the 1973 State Championship would both be held at the Del Webb Towne House in Fresno.

The matter of updating the State list of approved tournament directors was discussed and the concensus was that we should wait until the United States Chess Federation reports its certification program.

Gordon Barrett reported upon the Southern California Hall of Fame, and moved that Northern California and Central California jointly adopt the same system. A permanent place would have to be found for the photographs and placques. The California State Chess Federation would recognize both Halls of Fame, although they would be housed separately. Motion passed.

The meeting resolved that the tournament director of The California Open and the California Class Championship should be compensated at the rate of \$1 per player with a minimum of \$100 and a maximum of \$150. Assistance should be provided if the tournament is anywhere near the size of the 1972 California Open at Ventura -- over 200 players. Hotel room for the director also to be provided.

The meeting was adjourned at 10:15 P.M.

Respectfully submitted, Irving Rivise Secretary Pro Tem.

FRENCH POISONED PAWN, A Study of the Sally Qd1-g4:g7, by S. Zeuthen and E. Jarlinaes. Zeuss Transactions, Copenhagen. Paperback, 124 pages, 160 games, 84 diagrams. In English. The Chess House, 24 Studiestraede, 1455 K. Copenhagen. Price 40 Danish Kroner, or about \$5.80. Or order from The Reporter.

An entire book about one line in the Winawer Variation of the French Defense: What is chess coming to? The attitude nowadays seems to be "prepare yourself." There are more prepared variations than ever before, and to my tired old eyes it appears impossible to keep up with everything. In the smallest local tournament you run into young people who play like Fischer.

The Danish authors have compiled a thorough compendium. They have spared no pains to cover all possibilities. As an old French defender, I can only wish that I had this book years ago. It is divided into eight chapters, ranging from the "simple" Blitz Variation 1. P-K4, P-K3; 2. P-Q4, P-Q4; 3. Kt-QB3, B-Kt5; 4. Q-Kt4 to the sophisticated "Euwe-Gligoric" and "Konstantinopolski" variations, which run ten moves until the basic position is reached and the analysis begins. The pages at the left are blank so that the reader may jot down his own analysis.

The authors' conclusions are that the "poisoned pawn" is not deadly and White can take it if he is willing to have his Queen-side demolished. White, meanwhile, has demolished Black's King-side. "Thus the two flanks disintegrate at the very beginning of the game due to the Q-sally and play develops in a complicated and original manner."

GAMES

STAMER MEMORIAL, JULY 1972 7. P-K5 Kt-K5 Game No. 1224 - Ruy Lopez 8. R-K1 (Notes by John Grefe) Far more promising is 8. KtxP, White Black but after 0-0; 9. P-B3, KtxP can D. Krause D. Fritzinger be played with a complicated P-K4 P-K4 game (10.R-K1, P-Q4; 11. P-KB3, 2. Kt-KB3 Kt-QB3 P-B4, saving the piece.) 3. B-Kt5 P-QR3 8. . . . Kt-B4 4. B-R4 Kt-B3 9. BxKt KtPxB 5. P-04 10. KtxP 0-0 This move has not gained great pop-11. Kt-QB3 P-B3 ularity as it releases the central Eliminating White's advanced tension early in the game allowing post and gaining an open file. Black a free development. 12. K€-B5 PxP

Game No. 1225 Benoni (Notes by John Grefe)

	White	Black
J.	MacFarland	J. Grefe
	1. P-Q4	Kt-KB3
	2. P-QB4	P-B4
	3. P-05	P-K4

The Czech Benoni. The characteristics of this variation are a
closed center with complex play
on both wings. Black does not
fianchetto his King's Bishop, but
hopes to be able to play...BK2Kt4 and exchange it for its white
counterpart, which is not blocked
by its own pawn.

4.	Kt-QB3	.P-Q3
5.	P-K4	B-K2
6.	B-Q3	0-0
7.	Kt-B3	QKt~Q2

8. P-KR3

Black's objective is to play... P-KB4, and here White chooses one of the more aggressive lines against this variation. He will oppose Black's plans directly, hoping that his advanced Kingside pawn will be useful in opening lines later for a Kingside attack!

8.	• • •	Kt-K1
9.	P-KKt4	P-KKt3
10.	B-R6	Kt-Kt2
11.	Q-B2	

As a recent example of how White may continue if he does not want to castle Queenside, there is the game Antoshin-Ivkov, Poljanica Zdroj, 1970, which went (with some transpositions)11.Q-Q2, P-R3; 12. P-R3, Kt-B3; 13. P-Kt4, P-Kt3; 14. K-K2, K-R1; 15. QR-KKt1, B-Q2; 16. R-Kt3, Q-B2; 17. KR-KKt1, P-Q Kt4; 18. P-KR4, KtPxP; 19. B-B2, PxP and 3lack won in 29 moves.

CALIFORNIA CHESS TOURNAMENT BULLETIN

This monumental enterprise is devoted to game scores from California tournaments. A subscription is \$4 for six months. Write Steve Sawyer, 340 Jones, No. 448, San Francisco, CA 94102, or order through The Reporter.

Tasks:

No. 326
R. Willmers
Deutsche Schachzeitung, 1859

In attempting to solve "more movers," it is helpful to start with this basic evaluation of the position: is Black in zugswang, or does he have ample free moves? In the first problem, a quick examination shows that Black has no safe move, since 1...R-B8 is answered by 2. QxRt,

has no safe move, since 1...R-B8 is answered by 2. QXRt when R-B7 allows 3. Q-K1 mate. So White must lose a move, and he has two moves in which to lose a move! In the second example, the Black pawn signifies that White must actively create a mating net. Can you see it? (Willmers, incidentally, was a noted concert pianist in his day, 113 years ago)!

Solutions: The "waiter" is solved by 1. Q-R7: R-B8; 2. Q-Kt6! R-R8; 3.Q-B5, forcing Black to move as above. (Why not 1. Q-Kt6 first)? The mating net is set up by 1. R-R7, any 2. Kt-R5, any 3. R-Kt7(ch) any 4. P-Kt4 mate!

3RD REDWOOD CITY OPEN

Date: November 11-12, 1972.

Place: Redwood City Chess Club, Recreation Dept., 1400 Roosevelt Ave.,

Redwood City, Calif.

Bonus prize opportunity by 11/4. \$12 Premier, \$8 Booster, Entry Fee:
