March 10, 1996

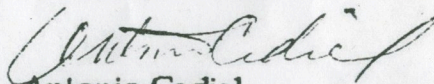

Dear Mr. Roberts,

Thank you very much for your contribution of six chess sets to our school. As I mentioned to you before, a number of the students have just recently - within the last couple of weeks - been introduced to the game of chess and have been inquiring about the possibility of starting a chess club at school. With that in mind we have already had one fundraiser at school in order to purchase some chess sets but have so far fallen short of the required funds.

Since neither our students nor our school have much money to spare, we have had to rely heavily on the generous contributions of organizations and individuals such as yourself in order to provide our students with many of the amenities that most schools take for granted. It was with amazing luck that my class and I happened upon you and the students you were teaching last Thursday afternoon. Your obvious love for the game is quite contagious and I must say that our students are even more excited than ever about the chance to learn and play.

On behalf of both students and staff at the Charter School, it is with great appreciation that we accept your donation. Thank you.

Sincerely,

Antonio Cediell

Jingletown Charter School Teacher
