

"CYBERCHESS, the mechanical chess playing machine that is proving to be the dream come true of every chess player or enthusiast who wants to improve his game....and who doesn't"

BILL USSERY
Daily Times, Slide 11, LA

"Chess activity without a live partner for a relatively small outlay. Simple to set up and learn"

EDWIN ALBAUGH
The Washington Star, Washington, DC

"CYBERCHESS represents an advanced concept in chess teaching well worth the price....All in all CYBERCHESS merits the enthusiastic support of practically any devoted student of the game"

RICHARD SHORMAN
The Daily Review, Hayward, CA

"I have used CYBERCHESS in all my chess classes for both adults and children and in my opinion this magnificent concept is unmatched as a game improvement tool"

USCF MASTER ROBERT M. SNYDER
Author/Educator, Garden Grove, CA

Dear Chess Player:

You, too, can experience exceptional improvement in your chess game - greater enhancement of your enjoyment - when you play with CYBERCHESS.

You can play with CYBERCHESS anytime you feel the urge or desire, even when you do not have a partner available. It is your always-ready partner, days, nights, weekends, even during lunch hour on the job.

You can play against a superior, stronger opponent without the discomfort of losing (no one but you will know). Or you can play against a weaker opponent just for the thrill of it.

Improve your game progressively by playing against ever stronger opponents...and you get professional guidance or comments on every move you make. That way, you learn to play stronger, wiser, more aggressive chess.

CYBERCHESS is the only user programmable, variable playing strength, low cost chess playing machine. It is the most powerful, effective, complete system for the improvement of chess.

You program CYBERCHESS for any desired level of play from USCF 900 rating up to 2200. Then, the unique, precise numerical move rating system and exclusive CYBERATER analysis text constantly monitor and comment on your every move. You learn the implications of every move...and the errors in every wrong move...so that you constantly learn how to improve your long range strategy - effortlessly, privately.

Choose whether you want to play against an easy or a tough opponent. Insert the programmed playing card of your choice and you are ready. CYBERCHESS will play against you and you may win or lose, depending on how good you are and how diffi-
