CYBERCHESS: A POWERFUL TOOL FOR SELF-IMPROVEMENT

Marked improvement at chess for the most part takes place only with regular tournament play and systematic study. But competition teaches best when practiced against superior opposition, which means losing a lot, while books commonly require the reader to "listen" rather than "converse."

A new device called CyberChess permits aspiring players to actively participate in games with master opponents, without going to tournaments and without getting bogged down in books.

Not a computer, and much less expensive, nor even a machine in the ordinary sense of the word, CyberChess is really a sophisticated solitaire chess display-case about the size of a large, manila envelope (13x11x¾ inches). Insert a pre-printed game card into the slot on the side of the frame, adjust the sliders on the front panel and select a move from among the six choices shown in the window. Choose right and be rewarded by a measured number of points and the opponent's reply. But push up the tab under a wrong move and points will be deducted in accordance with the degree of error, plus the necessity for choosing again.

Always being forced to discover the master move in every position, even after false tries, cannot help but produce positive results, especially if a chess clock is utilized to simulate tournament conditions and a record kept of all the moves.

Much of the advertising for CyberChess appears exaggerated and extravagant, tailored to a hard-sell mass audience, but underneath the flashy imagery rests a solid, powerful tool for self-improvement. CyberChess represents an advanced concept in chess teaching, well worth the \$33.75 for the basic unit. Additional packets of four games each cost about \$2, while the marginally useful explanatory notes to the games may be purchased separately for \$1.50 each, plus tax. All in all, CyberChess merits the enthusiastic support of practically any devoted student of the game.

Requests for detailed information about CyberChess and orders may be sent directly to the manufacturer: CYBER Enterprises, P.O. Box 2066, Cerritos, Calif. 90701.

U.S. WOMEN'S CHAMPIONSHIP RESULTS

The 1978 Women's Invitational (Closed) U.S. Championship was played in Rochester, N.Y., July 8-24. Pearle Mann was chief arbiter, with Ed Frumkin the Tournament Director for the ten-round single round-robin event, which also served as a zonal competition to qualify three American players for the coming world championship cycle. Complete results:

1st-2nd, Rachel Crotto (2080), Jamaica, N.Y., and Diane Savereide (2159), Santa Monica, 7½-2½ each; 3rd, Katherine Gasser (1881), Saugus, Mass., 7-3; 4th, Ruth Haring (2023), San Francisco, 5½-4½; 5th-6th, Gisela Gresser (1916), New York, N.Y., and Susan Sterngold (1837), Chappaqua, N.Y., 5-5 each; 7th-8th, Pamela Ford (1770), San Francisco, and Hedvig Olsson (1804), Santa Monica, 4½-5½ each; 9th, Mary Conlon (1777), New Haven, Conn., 4-6; 10th, Ruth Donnelly (1860), Massapequa Park, N.Y., 3-7; 11th, Karen Street (1857), Los Angeles, 1½-8½.

Here is a selection of spirited games played in the 1978 U.S. Women's Championship and Zonal, recorded in USCF mandated coordinate chess notation (files lettered "a" to "h," ranks numbered "1" to "8," always counting from White's lower left corner regardless of whose turn to move; pawn captures designated by file letters only).

White: Rachel Crotto (2080). Black: Ruth Haring (2023). U.S. Women's Championship, Rochester, July 14, 1978.
